EXPERT INVERSE WITNESS REPORT

1. Obtain full name, address, phone numbers, email and other data and record same.

Paul Czysz
142 Laduemont Dr.
St. Louis, MO 63141-8052
314-434-2188 (H)
314-977-8212 (W)
314-434-5331 FAX

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate).

Currently a full professor of Aeronautical Engineering at St. Louis University.
Paul Czysz teaches hypersonic aerodynamics. He spent 7 years at Wright-Patterson Air Force Base as an officer and as a civilian researcher; 29 years as an engineer at McDonnell-Douglas specializing in faster-than-sound aircraft design.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project.

Czysz is both a sympathetic inverse witness and a source of possible high level technical witnesses who may have worked on compartmented projects dealing with the ETI subject. One such sensitive witness is his long time associate Paul Murad whom Czysz claims may have worked at Area 51 and who provides detailed lectures on the physics of UFO propulsion for select audiences that are well attended. Another possible witness is moon walking Apollo astronaut Tom Stafford whom Czysz claims at one time ran the Pentagon's entire black budget program and knows a lot about what the astronauts have seen. His last discussion with Stafford about these matters was in 1990, and at that time, Stafford made it clear that he would never publicly reveal what he knew. He told Paul that the astronauts have been compelled to lie about what they saw. Czysz told me that he may try to approach Stafford and Murad on our behalf. There may be other contacts he could approach, and will give it serious thought. Paul was willing to go to bat for the project.

He is also a highly knowledgeable interpreter of conventional aircraft and classified aircraft R&D. He can articulate details about exotic technologies used in the Stealth Bomber, Aurora, SR 71, etc., and provide historical references to current state-of-the-art propulsion systems and atmospheric physics. He can tell an audience what aspects of flight dynamics are conventional and which would indicate "exotic" technologies at work, and he can tell us precisely how long the U.S., Russia and other nations have utilized such technologies, placing them in perspective relative to the post WW II UFO era.

In addition, Czysz is also very knowledgeable about the UFO subject from a technical point of view and can provide intelligent extrapolations as to which characteristics of modern military craft may or may not be ET derived.

He has served on a number of compartmentalized "black projects" and is an excellent interlocutor for presenting how security is enforced, how secrets are kept and how discipline is maintained. He knows how secrets can be kept and is capable of describing this vividly and accurately.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases)?

Highly cooperative and willing to go on videotape in whatever capacity we need him.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials

See above.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Yes. See above.

7. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc).

Highly knowledgeable expert witness with verifiable credentials and sterling military service record. Years of experience on the inside of compartmented "black projects". Highly articulate with detailed knowledge.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

More or less at our discretion. He may be going out of town for a couple of weeks, but is generally available. Call to schedule. Use Ralph and Leslie as references.
