Steven,

I spoke to [REDACTED] this morning. He will not be on the east or west coast during the next few months. I went over the Wright Pat event with him. The "zinger" you mentioned about discs flying at 20,000 mph was the same incident - which occurred in 1957 - and they were not flying "out of Wright Pat" but travelled over a number of states. He estimated 10's of thousands of mph from different observers seeing them in different locations in a matter of seconds (similar to the Millstadt sightings last year). He has no documentation or names and had no access to any of the FTD response or reports. But the incident itself is definitely interesting as he describes it. He was a lieutenant in charge of answering the phone that day. There were objects in formation seen by many qualified observers (including police and pilots), covering a long distance, picked up on radar, demonstrating extraordinary capabilities, and reported to the FTD by him. The FTD told him this was only "hysteria" and he shouldn't pay any attention to it.

I can send you more specific details later from careful notes that I took, if you want. He knows nothing of any bodies or anything alien being stored at Wright Pat and thinks that would have been unlikely.

He is willing to put the information into a tape recorder. You or I could be on the phone with him with questions and he could tape the answers. Another thought I had was that maybe we could send [REDACTED] there with his camcorder. You or I could pose questions on a speaker phone and [REDACTED] could shoot his responses. If you really wanted to take this all the way, we could make sure Paul is dressed the same and shoot it in the same location, and you'd be able to use it along with what you have if you didn't mind a slight body shift (obviously it wouldn't be exactly the same). [REDACTED] goes to Chicago regularly which is not that far from St. Louis (maybe 5 hours?) I don't know about cost... I suppose he would need to be paid and have one night in a hotel. Maybe we could work something out that could be minimal.

What do you think of this idea? Were you happy with [REDACTED] camera work?
I'd be willing to contact [REDACTED] about this if you want. Let me know. I hope we
can come up with a plan that will remedy the situation.

[REDACTED]
