Woodbridge
RAF - UFO
siting

February 1980, at about 0200 hours at the back gate (East Gate) of RAF Woodbridge I witnessed with A1C Duffield a UFO siting that moved from East to West...moving across the runway at a high rate of speed. The UFO (light) didn't make any sound but stopped in mid air...moved up, down, left and right...split into three pieces and sped across the runway. I was working Law Enforcement and did report the siting to the Law Enforcement Desk. I was instructed to go to the tower and report the finding. They didn't see anything...and I think the incident was dropped. Then there was a similar incident that occurred December of 1980 in the same location, roughly the same spot. There is more to this story...like my dreams. I can't seem to get the place out of my head.
