

Subj: **Resend of [REDACTED] report**
Date: 7/31/00 8:06:03 PM Eastern Daylight Time
From: [REDACTED] ([REDACTED])
To: [REDACTED]

WITNESS REPORT: [REDACTED]

1.. Obtain full name, address, phone numbers, email and other data and record same

[REDACTED]

2.. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel., corporate)

Was stationed at an Army base in Sinop, Turkey from 1972 – 1973, a joint American/Turkish base with the purpose of eavesdropping on the Soviets by monitoring communications. He had been trained as a cryptologist so he could decipher codes in communication. Was at a high level of handling information, a "Specialist 5," equivalent to a Sergeant. He had top secret crypto clearance with a password..

In '74 left army. For last 20 years has been a staff specialist in computer systems at Buffalo State College.

3.. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project

Located on a peninsula on the North coast of the Black Sea, the Sinop base was next to a mountain range, with only one road in and out, very remote. Above mountain peaks at night, he saw UFOs almost every night. It happened so regularly that the locals paid no attention and scoffed at it. There were lights, sometimes he could see large spheres with a smaller one orbiting around it. They rimmed the hills and played leap frog with each other; sometimes they were strung out in a long line. Exhibited phenomenal acrobatics and would also pop in and out (disappear and reappear). He says that no way could it have been a Soviet craft. About 15 to 20 miles away usually between 2 and 4 am. He and others on that shift would sit out on the steps and watch. The Military Police would comment "good show tonight."

Nobody ever did anything about it. They never felt threatened by it. They were ordered not to try and contact the lights. If a newcomer asked, they were just told that this is how it is around here, we don't know what it is, end of discussion. It was a matter of policy that the phenomena would not be referred to as "UFOs." He believes that the airbase commander (Lt. Colonel was highest rank) knew something; they would cut off conversations about it and acted like it didn't really exist.

The base is now closed.

4.. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise

(we want to discourage this except in rare cases) ?

Willing to be interviewed, 100%. There was nothing secret about these sightings.

5.. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials

Says he could get in touch with others who saw this. It was so common that many people saw it. There's a website that might have additional information: search Sinop, Turkey.

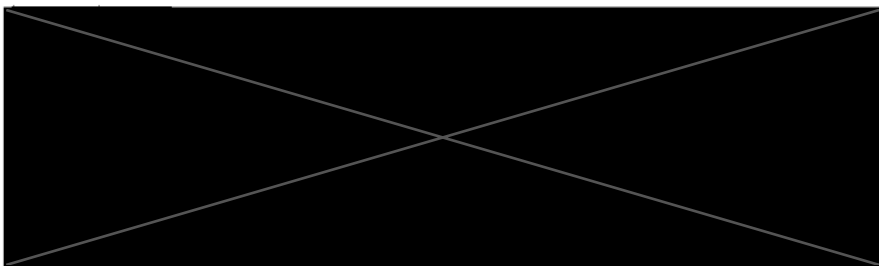

6.. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

He works with military organizations and says he knows a number of Vietnam vets who had encounters with UFOs in the jungles there, including one who has a photograph of a landed craft. He found out the vet is in jail and he doesn't know where; couldn't find any other vets that could help us.

7.. Write your own assessment of the value of the witness' testimony and credibility, and HOW the witness comes across (articulate, etc) .

Totally credible. Clear and articulate.

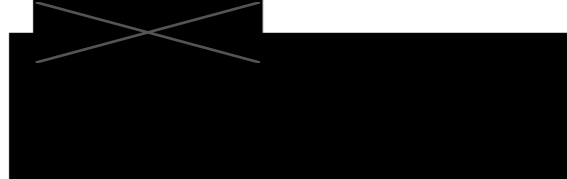

[REDACTED] / July, 2000
