Subject: Re: steve this is what he just sent me, he said the mj-12 numbers are real

We have gone public as it does no one any good to keep them secret. We will see if anyone from inside can further corroborate. I know the info within the docs is accurate for the most part.

[REDACTED] should be aware that the entity managing UFO secrecy is a USAP, operating outside constitutionally required oversight, and therefore there are no laws that govern such docs. Once a op goes rogue and illegal, all it's activities can be exposed. They cannot have it both ways: break the law, and invoke the law. Steve
