CONFIDENTIAL AND SENSITIVE

Dear Mr. Podesta,

I have followed with great interest and admiration your career of service to our nation, and in particular your interest in ending unconstitutional UFO secrecy.

Enclosed is a very sensitive briefing for you and President Obama on the subject, as well as documents related to some recent key developments:

1. The government and Ministry of Defense of France (please see enclosed MOD documents) have invited CSETI to assist them in making official contact with interplanetary visitors to earth. They are understandably concerned about US interest and support for such an initiative, and specifically would like the support of the US President.
2. Last week, a highly placed DOD scientist confirmed, again, that there are covert satellite and reconnaissance systems that are tracking and targeting ET vehicles as they approach or enter earth's orbit. This represents an existential threat to US and world security and needs to be addressed carefully but immediately.
3. A scientist (who has worked for many years in highly classified projects on advanced energy and propulsion systems) has been released to work with TheOrionProject.org to develop breakthrough energy systems. These involve sciences and physics that would enable the world to eliminate the need for oil, gas, coal, nuclear power and costly wind and solar alternative energy systems. He is NOT cleared at this time to work with us on propulsion systems that involve electromagnetogravitic ('anti-gravity') systems, although he has built these technologies for various classified projects in the past. We urgently need to discuss how to best support the work of this scientist, who is a true national treasure. Specifically, since he retires from his command in September of 2010, we need to stand-up an unclassified Manhattan-style new energy project, with the support of the US government, as quickly as possible.

4. Recently, CSETI has had increasing, confirmed contact with ET civilizations (see enclosed DVD of Nov. 2009 Joshua Tree event and others) and this indicates that the time for secrecy on this subject will expire soon-one way or another. We would like to discuss the implications of this with you in an informational briefing.

Please let me know if it would be possible for us to meet, confidentially and off-the-record, at your earliest convenience. I have a home in DC in the Dupont area and am in Washington most weeks.

Thank you for your interest in this fascinating subject and I hope that we can discuss these issues soon.

Sincerely,

Steven M. Greer MD

Director

CSETI and The Disclosure Project
