The Center for the Study of Extraterrestrial Intelligence

April 24, 1994

**Steve M. Greer, M.D.
International Director**

Dear Mr. [REDACTED]

Project Starlight continues to progress remarkably, and we have been successful in making senior contacts with government, military and other leaders in society.

We urgently need to quicken the pace of collection of materials for the Best Available Evidence (BAE), so that complete briefing documents can be prepared for these leaders. Through a number of high level meetings, we have reached the assessment that the President of the United States (POTUS), the key and relevant cabinet members, most if not all of the Joint Chiefs of Staff (JCS), and similar leaders overseas are "out of the loop" on this subject:

It has become clear that we must not assume that these leaders, including POTUS, will be accurately briefed even if they take the initiative to inquire about this subject from relevant agencies. I am not optimistic that they will be told the truth; in fact, I seriously doubt that, unaided, they will be able to even identify the group/entity/persons to whom they could address an inquiry and obtain full disclosure.

For this reason, we should assume very little regarding A) what they know about this subject; or B) how much access they have in the event of an inquiry; or C) the level of accuracy of information which will be supplied to them in the event of a full inquiry. I believe that they will not be told the truth, but will be told a "spun" version of it, if any thing at all.

For these and other reasons, I feel that we must move rapidly to assimilate the Best Available Evidence and brief these leaders, including POTUS, as soon as possible. We should become the briefing source of choice for these leaders, and be prepared to provide them with trusted and accurate information. This must be done soon.

For the record, I wish to state that our current assessment of the group/entity controlling this subject is characterized as follows:

Multinational	Multi-Agency	Quasi-Governmental
Quasi-Civilian	10 levels deep "Black"	Funded by both Government "black"
Multi-Disciplinary (science, military, high tech, religious, etc.)	and Civilian Funds	

The "Government" as normally thought of does NOT have direct control of or access to this group; in this sense, when your average government spokesperson or leader states that they do not know anything about this subject, they are really telling you the truth. There are, however, U.S. government programs that interface with this subject and have representatives in this group. For example, the NRO KH-9 and KY-11 satellites (as well as the "Slow-Walker and Fast-Walker" systems) have tracked these spacecraft and I understand photographed them in great detail.

P [REDACTED] 501-251-0650 [REDACTED]

Because I am personally overwhelmed from a time point of view, I have appointed Mr. Wayne Peterson as your "point person" to further collect BAE materials: M [REDACTED]
[REDACTED]

We very much appreciate your cooperation in this endeavor, and you will be fully credited in the briefing document for any relevant contributions. We would very much appreciate it if you could review your files and share with us the following items:

- Photos, Videos, & Movie Footage -- with histories & analysis if possible
- Radar/Visual Cases
- Pilot Cases (military & civilian)
- Landing Trace cases
- Multiple witness sighting cases
- Electromagnetic effects cases
- Government documents of high evidential value
- Government witnesses and sources, willing to testify with immunity
- Copies of, or the dates & name & numbers of security oath forms signed by government/military people (NEEDED STAT)
- Objects of Extraterrestrial Origin (metal, etc)
- FOIA Requests (both those denied and those fulfilled, with copy of original request and reply, if any) (NEEDED STAT)

Reasonable costs related to copying and shipping these materials can be reimbursed. We would appreciate it if the initial search for these BAE materials could be completed no later than May 31, 1994.

POTUS, JCS, relevant Cabinet members (US), relevant foreign leaders and others will receive these briefing materials, with recommendations for further cooperation and disclosure of UFO/ETI related materials. They will also be assisted in identifying those groups, entities, agencies, persons, etc., who have access to "hard" evidence.

At no time in the past fifty years has so much potential for disclosure and cooperation existed as it does now. With a concerted and cooperative effort, we have no doubt that this subject can at long last be established as a valid area of study, and the truth will finally be shared with the people of the earth.

We look forward to working with you in the coming weeks.

My name is WP and I am calling for Dr. Steven Greer of CSETI. As you know, we are gathering the BAE for the UFO/ET phenomena. Please send copies of all relevant material you can share for Steven's high level briefing staff. Please call me if you have any questions.

Sincerely,

Steven M. Greer, M.D.
International Director of CSETI

P.S. If you have any questions you may reach me at my home office number: [REDACTED]

DATE: 5-31-94
TO: Dr. Green
FAX #: [REDACTED]
FROM: [REDACTED]

Number of pages including cover sheet: 6

Comments: Copy of BAE/Starklight letter and list of names sent to — plus Wayne's notes on additional contacts as information became available. Most of these people are on computer as VIPs — do we need to add a category for BAE contacts? I can easily code the appropriate people this way for future reference.
