Subject: Witness willing to talk

Dr. Greer,

I do not know if you have heard about the incident in December of 1980 at RAF Bentwaters/Woodbridge in Suffolk County England but There was a bit of a to-do there.

There have been a few books on it and all. I was a Security specialist assigned to the 81st Sp Squadron and have my side of the story to tell. I was not a witness at the big deal the books are about but I am a witness of a UFO some three weeks after. [REDACTED] was the base commander and had just been promoted to General.

He responded to my sighting along with a half dozen other high ranking officers.

figures there must be something to it with all that heavy metal there.

If you are interested I can tell you every thing I know about the thing.
be warned though I am a bit long winded with details..... I love details. I have a 135 IQ and remember everything that happened there like it was right now.

Drop me a line
