Dear [REDACTED],

There are two different film companies who are interested in the USS F.D.R. UFOs Story and want a Script done on it. I am now writing the Script and would like to use your letter of February 1992, about your 1956 UFO Sighting on the USS F.D.R. CVA-42.

Sincerely,

[REDACTED]

Dear [REDACTED]:

I am contacting you in an effort to gain more information about your UFO sighting aboard the Naval carrier, U.S.S. Franklin D. Roosevelt in the 1950's. I have recently spoken with [REDACTED] who has supplied me with your name and address. I am a producer for a television series called, "Sightings". I produce segments concerning unexplained UFO activity. I am currently researching the possibility of producing a segment concerning the various sightings aboard the F.D.R. during the late 1940's and 1950's. I am especially interested in speaking with you about your experiences and about any other individuals who you know of that also witnessed UFO activity on the F.D.R.

You may telephone me at my expense at, [REDACTED]. I am available to receive your call from 9 AM - 6 PM Monday through Friday. You may also leave a message for me at any other time. I look forward to speaking with you soon.

Best Regards,

[REDACTED]

[REDACTED]

Thank you for your letter of January 20, 1996.
I have enclosed to you a copy of your February 21, 1992
letter. And, also the letter dated August 10, 1983.

We are in the process now of writing the script,
if you have any other information you could help me out
with, just let me know.

Sincerely,

[REDACTED]

From Teenage Enlisted Sailor to Flag Officer

BLUEJACKET ADMIRAL **The Navy Career of Chick Hayward**

by J. [REDACTED]
[REDACTED] "Chick" [REDACTED]'s long and colorful career spanned the decades from naval aviation's infancy to the dawn of the jet age. He was one of those rare people who was eminently successful yet humanly colorful, a high school dropout who became a nuclear physicist. The story of his role in the development of the atomic bomb and his interaction with the other Los Alamos scientists is justification enough for a biography, but Hayward's contributions to the twentieth-century U.S. Navy go significantly beyond that period. Hayward saw combat in World War II and participated in the Korean War and Cuban missile crisis, and helped make many of the decisions that shaped the present-day navy.

From his service as an enlisted man to his rise to a flag officer [REDACTED] experienced life as a "powder monkey" on a battleship, a president of the Naval War College, a founder of the Lawrence Livermore Laboratory, a key player in getting nuclear weapons to sea, and an early developer of cruise missiles. An avid supporter of naval aviation, he amassed more pilot hours than any other flag officer and was one of the navy's first jet-qualified pilots. Hayward's longtime friend C.W. Borklund developed this autobiography from the admiral's 300-page diary. It captures the spirit as well as the facts of Hayward's history-making career, focusing on his involvement in events that had a major impact on politics, military policies, and plans. Highly personalized and sometimes opinionated, the memoir provides a great deal of insight and food for thought about today's navy.

[REDACTED] left high school in 1925 to enlist in the navy. Five years later he graduated from the U.S. Naval Academy to begin a forty-year career as an aviator, nuclear physicist, and weapons expert. He died in 1999.

[REDACTED] retired in 1990 from a thirty-three-year career as a magazine editor-publisher in Washington, D.C. He lives near Locust Grove, Virginia.

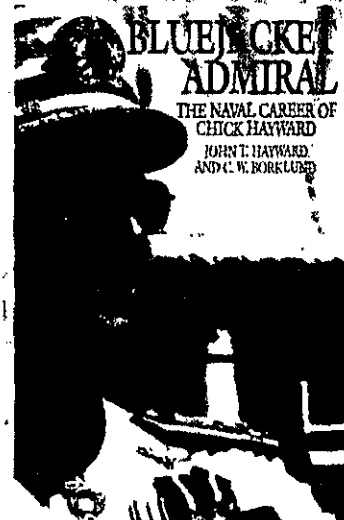

A Comprehensive Analysis

MARINES UNDER ARMOR **The Marine Corps and the Armored Fighting Vehicle, 1916-2000**

[REDACTED]
In this story of men, machines and missions, Kenneth Estes tells how the U.S. Marine Corps came to acquire the armored fighting vehicle and what it tried to do with it. The longtime Marine tank officer and noted military historian offers an insider's view of the Corps's acquisition and use of armored fighting vehicles over the course of several generations, a view that illustrates the characteristics of the Corps as a military institution and of the men who have guided its development. His book examines the planning, acquisition, and employment of tanks, amphibian tractors, and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them, and their actual use in combat.

Drawing on archival resources previously untouched by researchers and interviews of both past and serving crewmen, Estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles, their leaders, and the men who drove these steel chariots into battle. Such authoritative detail and documentation of the decisions to acquire, develop, and organize armored units in the U.S. Marine Corps assures the book's acknowledgement as a definitive reference.

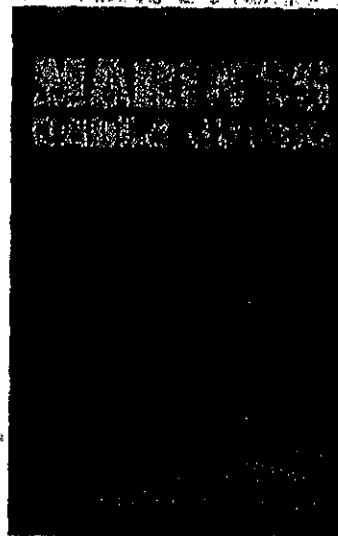

Kenneth Estes retired as a lieutenant colonel from the Marine Corps after a twenty-four-year career specializing in tanks and operations. Editor of the *Marine Officer's Guide* and the *Handbook for Marine NCOs* (see pages 62 and 63), he holds a Ph.D. in history and has written extensively in military journals for the past thirty years.
