 Fw: I Wish To Make Disclosure to Your Project

Do you want me to call this person? Obviously I can't meet with her from CA. It sounds like she might have some useful info.

Thanks,

Linda

Re: new witness info

Yes, I did get an email from this lady on Mon., and was planning to call her. Obviously I can't do any more than that from here, so it sounds like a great idea if you could interview her on video and in person, since you leave nearby. She sounds like a great witness. In her email, she also expressed fear for her life because of the things she knows, so a taped interview could put her under the DP security umbrella, which could give her some peace of mind. Steve had also suggested getting any corroborating evidence such as documents, photos, names of other witnesses, etc., and wants those things sent to us ASAP for safe keeping.

Here's a copy of the message she sent me:

Hello,

I would like to arrange a meeting with one of your representatives to make a private UFO disclosure so it will be on the record in the event of my death.. My ex-spouse was a witness to the extraterrestrial aircraft stored at Groom Lake. I am privy to a volume of UFO disclosure information plus a great deal of information involving government and political corruption. I am currently being harassed by persons unknown and have a reason to believe that my life will be short.

My information is below. Please contact me so I may make a formal disclosure.

Thank you very much.

Thanks,

[REDACTED]

new witness info

[REDACTED]

[REDACTED] - she may have sent an email this past weekend to

[REDACTED]

I got a call today from a woman named [REDACTED], currently living in

[REDACTED]

She wants to be videotaped as soon as possible, giving a deposition about her ex-husband's involvement in the Air Force as a flight attendant on the Air Force 2 aircraft in the mid 80's.

She hopes to get him to talk as well, but up until now he has been afraid and probably threatened.

(She's going to give his name and other names who we can contact if needed.) This secrecy

probably is what caused them to get a divorce a couple of years ago.

Her husband heard, for

example, Kissinger discussing an ET craft at Groom lake, and the military industrial complex issues.

She says that Bectel Nevada (an association of 3 companies - Bectel, Lockheed-Martin, and

Johnson Controls) runs the whole Groom Lake complex.

[REDACTED] told me many things. She is aware of quite a bit of the

information that you know, Steve. She

can corroborate a lot of witness testimonies, including [REDACTED] (some things). Her husband went

to Groom Lake in 1985 and saw the ET craft there. She says that the ETs gave 3 countries each

a craft. Interesting.

She has information about the military involvement with abductions, and mind control.

A big thing is the connection between Iran Contra and Groom Lake. She and her husband lived in

Panama for awhile while he was in the military. He was a flight attendant on military flights of dignitaries, etc, and witnessed drug trafficking from Central and S. America.

I think she can talk about this for many many hours. She's going to make some notes in preparation for an interview. She has a ton of information. (for instance, she can confirm the Bentwaters incident as definitely ET).
