[REDACTED] t
400 reels of film

Dear Steven Greer,

I have just returned from a remarkable weekend with [REDACTED] who has some 400 reels of film of her UFO encounters.

I personally saw 3 UFOs in one evening, although I was very disappointed not to be able to see the huge triangular craft that four others saw easily (apparently much brighter and closer than the ones I was able to see).

The ineffability of the UFO experience is my chief consternation. Frankly, I should have been able to see it easily, but couldn't.

By the same token, I feel that others should easily be able to discern what I present as evidence of time-travel missions, but, frequently, they do not.

My recollections of these missions exist, and are seen, as through a glass darkly; thus, year, age, etc. may be unknown and unknowable. Still, I would be happy to share these details.

You may certainly send me questions via e-mail, or alert me to your availability.

I would be interested to hear your speculations as to why I was unable to see an easily visible UFO that 4 other people easily saw, which was much brighter and larger than the ones I did spot that evening.

Regards,
[REDACTED]

Subject: Re: Government Witness Information

Actually, at this time the scope of the project is not to obtain information technically on everything everyone knows. It is to obtain witness testimony regarding what witnesses know first hand regarding so-called unacknowledged, black projects related to exotic technologies, 'UFOs' and extraterrestrial intelligence. A direct account of a witness' experience in government related projects or events, their bona fides and the like is sufficient. It

is not our intent to disclose the full details of every exotic technology at this time as it is the beyond the scope of the project or the public's state of readiness.

Let me know if you can provide an interview specifically regarding your knowledge and involvement with such projects as they relate to government employment or association.
