

DISCLOSURE NEWS PROGRAMMING

Witness Archive Project

Dr. Steven M. Greer, Director

Information for Witnesses

Background

Since 1993, my team from the Center for the Study of Extraterrestrial Intelligence (CSETI) has identified hundreds of government, military, intelligence and corporate witnesses to projects and events related to unidentified flying objects (UFOs), extraterrestrial intelligence (ETI) and associated technologies. Witnesses have come forward from around the world.

From 1993-2000, we systematically presented briefings and substantive evidence to both United States and international leaders. In America, these briefings have included a Director of the Central Intelligence Agency (CIA), members of the Joint Staff, the Director of the Defense Intelligence Agency (DIA), numerous members of Congress, senior United Nations officials and others. Briefing materials have been presented to President Clinton through a number of channels. Witness testimony from individuals holding Top Secret clearances, government documents and other evidence were presented at the briefings.

Starting with a meeting at Wright Patterson Air Force Base in the fall of 1993, and later with CIA Director James Woolsey, we have consistently requested a near-term government disclosure on the subject of UFOs and ETI.

In 1998, after exhaustive attempts to obtain government cooperation in initiating such a disclosure, it became clear that a civilian-led effort was necessary. Indeed, members of Congress, senior military officers and other officials specifically recommended that we pursue this measure outside of government channels since a civilian-led, public interest disclosure would be the only way to secure official hearings and other government actions. For the last two years we have been organizing for this event. By June, 2000, the necessary structure and funding were in place to initiate the project, and we announced the launching of Disclosure News Programming (DNP), an investigative news organization spearheading the operation.

Disclosure

The goals of this project are to:

- Effect a credible, international disclosure of the facts.
- Establish the subject as real, legitimate and relevant.
- Return management of issues related to UFOs/ETI to democratic, legal and constitutional control.
- Restore congressional and public oversight of unacknowledged ("black") projects currently operating beyond constitutional authority.
- Prevent the unnecessary weaponization of space and its attendant world security risks.
- Release technologies related to energy and propulsion systems which could replace environmentally damaging and unsustainable fossil and nuclear energy sources.

The Role of Witnesses

An effective disclosure must involve credible government, military, corporate, and intelligence witnesses from around the globe who:

- Have first-hand knowledge of events, projects and/or evidence directly related to the UFO/ETI question.
- Are organized into a coalition or group which will come forward en masse as part of a carefully-planned, long term disclosure strategy.

Although supporting evidence such as photos and video footage, government documents and physical evidence are important, it is the witness testimony which is the crux of disclosure and will assure its success.

Combined with the other evidence, testimony from a host of highly credible individuals will make an undeniable case to mainstream political leaders, scientists, and the public. Past disclosures by isolated witnesses have not been effective because they were not part of a strategic plan or supported by other corroborating witnesses. Multiple, coordinated witnesses coming forward together will create a dynamic far exceeding these previous attempts. This unified effort will provide security, strength and enhanced credibility to the disclosure that will be greater than the sum of its parts.

The Witness Archive Project

The archive is designed to identify, verify and document testimony from hundreds of government, military, intelligence and corporate witnesses. This archive will be used to:

- Support the creation of an international, multi-media news project informing the public world-wide of the subject's legitimacy.
- Support the creation of executive briefing materials for leaders and for public education.
- Preserve the testimony for posterity.

Once a prospective witness is identified, either I or a Senior DNP Researcher will contact him or her. A preliminary history and report will be collected from initial interviews which will be kept in the project data base. Selected, pre-screened witnesses will then be scheduled for a formal interview using state-of-the-art video and audio recording equipment. Once all witnesses are interviewed, the archive will be reviewed and selections will be made for the Executive Briefing Summary and other projects described above.

Witnesses will be directed to avoid media or public exposure of their information until news conferences and media arrangements are finalized. In order to ensure strategic long-range effectiveness of the disclosure process, the dissemination of witness testimony will be undertaken as a coordinated, high profile mass release. Preemptive release of individual stories would be counter-productive.

Security

Information provided to DNP by witnesses will be kept confidential, only to be released if the witness has provided authorization and has agreed to come forward with us as part of the coordinated disclosure. It should be noted that the project has substantial support within various social, political, military and intelligence circles. By identifying with the project and joining with others, an umbrella of protection is extended to the witnesses. All interview materials are being duplicated multiple times, placed in secure storage, and put into the hands of influential individuals thus negating any attempt to muzzle the project.

Please notify me immediately of any harassment or threats to a prospective witness. Should such events occur, appropriate action will be taken.

Unless Otherwise Directed (UNODIR) Letter

In November 1996, we sent a letter to all key political, national security, military and intelligence officials in the United States regarding the invalidity of any national security oaths related to the subject (see attached). This UNODIR letter states that, since projects related to the subject are unacknowledged, "black," unlawful and unconstitutional, all legal agreements arising therefrom are, a priori, null and void. No corrective action or directive was ever issued to counter this assertion by us. Therefore, we regard such security oaths as null and void, without legal merit and witnesses should act accordingly. This position is highlighted by the fact that senior Pentagon officials urged us in 1997 to publicly effect this disclosure.

Conclusion

The witnesses who have already joined this effort consider it their patriotic duty to uphold and protect the constitution by coming forward. In light of the unlawful and dangerous nature of unacknowledged special access projects related to this subject, and the right of the world's citizens to be informed as to the UFO/ETI reality, we believe that this disclosure is morally justified. Continued secrecy is a threat to democracy and a danger to world security and the environment. The conscience of each witness should be clear that he or she is doing the right and just thing by coming forward.

I believe that our way of life will be profoundly affected by the success of this project.. You, as a witness to events or projects related to UFOs/ ETI, have a tremendous contribution to make to our collective future. No witness is insignificant since the big picture is created only by careful assembly of each piece of the mosaic. The time has come to join together and to tell the truth about this critically important subject.
