INTELLIGENCE ADVISORY COMMITTEE

Minutes of Meeting held in Director's
Conference Room, Administration Building
Central Intelligence Agency, on 4 December 1952

Acting Deputy Director (Intelligence)
Central Intelligence Agency
Mr. Robert Amory, Jr.

MEMBERS PRESENT

Mr. W. Park Armstrong, Jr., Special Assistant, Intelligence
Department of State
Brigadier General John M. Willems, acting for Assistant Chief
of Staff, G-2, Department of the Army
Rear Admiral Carl F. Espe, Director of Naval Intelligence,
Department of the Navy
Major General John A. Sanford, Director of Intelligence,
Headquarters, United States Air Force
Dr. Walter F. Colby, Director of Intelligence, Atomic
Energy Commission
Brigadier General Edward H. Porter, Deputy Director for
Intelligence, The Joint Staff
Mr. Meffert W. Kuntz, acting for Assistant to the Director,
Federal Bureau of Investigation

ALSO PRESENT

Dr. Sherman Kent, Central Intelligence Agency
Dr. E. Marshall Chadwell, Central Intelligence Agency
Mr. Paul Borel, Central Intelligence Agency
Mr. Ludwell L. Montague, Central Intelligence Agency
Mr. Philip Strong, Central Intelligence Agency
Mr. Joseph W. Smith, Central Intelligence Agency
Mr. William C. Trueheart, Department of State
Mr. Miron Burgin, Department of State
Lieutenant Colonel T. C. Anderson, Department of the Army
Lieutenant Colonel Edgar H. Thomson, Jr., Department of the Army
Colonel John J. Morrow, United States Air Force
Colonel Jack E. Thomas, United States Air Force
Lieutenant Colonel Thomas J. Grant, United States Air Force
Colonel S. M. Lansing, The Joint Staff
Captain John A. Holbrook, USN, The Joint Staff

Richard D. Drain
Acting Secretary

DECLASSIFIED PER SEC 3(A), E011652
APPROVED FOR RELEASE 207759
DATE 6 Oct 64 1978

~~SECRET~~
IAC-M-90
4 December 1952

000108

Approval of Minutes

1. Action: The minutes of the last meeting, 1 December 1952 (IAC-M-89), were approved.

Conditions and Trends in Latin America Affecting U. S. Security (NIE-70)

2. Action: Approved with minor modifications.

Unidentified Flying Objects

3. Action: The Director of Central Intelligence will:

- a. Enlist the services of selected scientists to review and appraise the available evidence in the light of pertinent scientific theories.

- b. Draft and circulate to the IAC a proposed NSCID, which would signify IAC concern in the subject and authorize coordination with appropriate non-IAC departments and agencies.

4. Discussion: The acting Chairman, Mr. Amory, presented to the committee the DCI's request that this subject be informally discussed. Dr. Chadwell briefly reviewed the evidence and peripheral considerations, and noted that most of the available evidence is processed by ATIC. General Samford offered his full cooperation. It was recognized that the problem is best approached if directly related to specific problems of intelligence and defense. It was thought desirable that the action noted above under "a" be undertaken immediately, with consideration of a proposed NSCID to depend in some measure on the results achieved by the scientists' studies.

Roswell, NM 88201-7955

Dear Mr. Stone

This responds to your recent FOIA/Congressional request. After a thorough search of our historical materials, we are enclosing two of the three documents related to Operation Blue Fly/Project Moon Dust which could be found among those holdings. Both have recently been declassified as a result of another FOIA. The third is still under FOIA review, and further information will be provided once the process is completed.

Sincerely

SHELDON A. GOLDBERG

Attachments

1. TWX, FTD/AFSC to AFMDC, TD-AWFA 2A 16-11-191, 16 Nov 62. This message is notification to proceed in setting up BLUE FLY.
2. Letter, FTD to AMD, et al "(U) Project BLUE FLY," 22 Oct 62.
3. Letter, AFSC to /to all divisions/centers/, subject: "AFSC Support to FTD for Activities Project," which is cited in letter mentioned above, dated 14 August 1961.

The 14 Aug 61 letter is apparently the first notification to this Center that the project was pending. It has been in existence for many years as a concept. /A document on the concept will be forwarded by Lt. Thompson/

[REDACTED]

INTERVIEW - MR. CORNETT with 2nd Lt. Joseph E. Thompson, AFMDC,
Foreign Technology, 7 January 1963.

Project BLUE FLY - Project first originated in 1961 as part of the Foreign Technology Division project activities to "exploit" when possible enemy materials. There are actually three projects as follows:

- (1) BLUE FLY - Exploit Soviet hardware when it comes more or less permanently into US or allied hands.
- (2) ROUND ROBIN - Exploit Soviet hardware when it comes temporarily into US hand (e.g., Russian aircraft landing at international or US airfields).
- (3) MOON DUST - Exploit big booster or missile and satellite equipment which fall from the air hence the name applied (e.g., the piece of Soviet equipment which fell into Wisconsin).

During the Cuban crisis, two BLUE FLY teams came into existence at AFMDC. The first for immediate reaction is composed of military only. They have blanket orders prepared and will participate in any invasion or go to selected points to review equipment falling into US hands. The second team is military and civilian. It is largely a concept and this team will more than likely be used in so called cool spots. They will not follow an invasion team but will go to selected spots where security is assured. During the Cuban crisis, the number 1 team had an aircraft on standby alert, had equipment issued and were waiting for a message to move into action. By this date, the second team has been picked and is available on a 48-hour call. AFMDC's participation in the BLUE FLY operation is in part limited by its geographical location. Most AFSC Center/Divisions and the Foreign Technology Division have similar capabilities. In effect the three operations or projects mentioned above are actually compiled into one team.

FINANCING THE OPERATION - Supply items are procured through normal supply channels because of the so called special items or equipment needed (i.e., special cameras, recording equipment, etc) are difficult (but not impossible) to justify at AFMDC. In the Cuban crisis no effort was spared in supplying the BLUE FLY team with normal supply items (e.g., B-4 bags and 45 calibre automatics).

TDY funds for the operation are justified through normal Finance funds. The only problem is the difficulty in budgeting for an anticipated operation. This coming fiscal year will be the first attempt at financing and justifying a budget for anticipated use. \$4100 will be requested in travel funds. The big problem, as explained by Lt Thompson, is in the split responsibility: orders come from FTD but the money has to come from the Center. "We have just recently been able to explain this concept to Colonel Cleveland."

(Uncl) "Blue Fly":¹⁴

This project remained in a "stand-by" status during this reporting period and was not activated. (Uncl)

A problem arose as to the priority classification assigned to "Blue Fly" project by the 18th Air Force. The liaison officer, Major Harold M. Bergeson, and the ATIC Project Monitor met and resolved this and other problems of minor importance. As a further result of this conference,

Colonel William W. Jones
Commander
5010th Air Base Wing
APO 937, Seattle, Washington

1. Reference is made to our telephone conversation, 2100 hours, 15 August 1962.
2. On 14 August 1962, at 2200 hours, this office received a call from Mr. Walt Gates, Army CIC, EL2-5453, who stated that a Mr. [redacted] Fairbanks, Alaska, telephoned he had observed an object sometime between 2230 and 2300 on 10 August which he thought might be the booster to a Russian satellite.
3. On 15 August I interviewed Mr. [redacted], date of birth - 1 December [redacted] Fairbanks, Alaska. Mr. [redacted] said he was an engineer for the City of Fairbanks, but lacked 30 hours towards his engineering degree from the University of Alaska. He advised that in 1955 he worked at Bethel, Bering Sea, for six months as an aviation weather observer, and during his life he has seen numerous meteors, but he has never seen an object such as the one he saw 10 August, which he stated was definitely not a meteor. Mr. [redacted] home phone [redacted] and his office phone [redacted].
4. [redacted] said when he first sighted the round object it was the size of a penny held in the hand at about arm's length and when last sighted, it was the size of a silver dollar. The object was white with a red and blue exhaust. The exhaust was similar to a 4th of July skyrocket when first sighted. Next, he saw 3 or 4 white and blue streaked objects, one-fourth the size of the main object, which appeared to drop from the main object and quickly burn out. When last seen, the main object was all white. He said the complete incident took place in four seconds. It was a continuous sighting and he heard no sound. The object drew his attention because it was extremely bright and appeared very close.

~~FOR OFFICIAL USE ONLY~~

It seemed to be dropping from the sky and heading toward him when it disappeared. Sighting from arm's length, the distance traveled was six to ten inches.

5. He saw the object sometime between 0830-0900 Zulu time, 11 August (2230 - 2300 local time, 10 August) and it was between twilight and night. The temperature was 65 degrees, clear visibility with a few scattered clouds. [redacted] said he was located at 148:31 E, 64:02 N or 50 miles southwest of Fairbanks when he made his ground visual sighting. When first sighted, the object was at a 30 degree angle above the horizon, azimuth 253 degrees and was last sighted 29 degrees 50 minutes, azimuth 253 degrees.

6. He roughly estimated the object may have been 500 or 1000 miles away, however, he could determine the distance by taking a sextant to the location since he knows exactly where he was when he saw the object.

7. [redacted] said [redacted] who is employed at the [redacted] Company, [redacted] Fairbanks, [redacted] saw the object for a longer period of time on the same night [redacted] saw it.

8. Brooks drew the attached drawings.
