

INTELLIGENCE MOLES IN HIGH UFO CIRCLES

This paper is a attempt to promote discussion of what could become a most heated debate. I would like to discuss and speculate on the issue of the penetration, infiltration and control of the UFO community by various intelligence agencies and other organs of government. I would like to state here for the record that I am not accusing any of the people I am discussing in this paper or elsewhere of being intelligence moles. I am simply saying that the possibility is that some of them could be. I want to make the UFO leadership accountable to the UFO community, I do not want to tarnish the reputations of any innocent party. I do want a increased public scrutiny of the UFO leadership especially where potential conflicts of interest exist between the UFO community which seeks the whole truth and the intelligence community which is responsible for the massive UFO coverup. This said I would expect to be continuously misrepresented in what I say because of the emotion my statements may bring. Instead of resisting public exposure and debate I would hope that those with intelligence connections and backgrounds will welcome the debate.

I tend to look at the UFO community as a intelligence agency dedicated to knowing the truth about ET/UFO's and informing the public of the whole truth and nothing but the truth. Like a intelligence agency the UFO community gathers, process and distributes information. Today the UFO community acts as would a intelligence agency that was fully compromised and in turmoil and disarray unable to carry out its mission. I think this is no accident for the evidence suggests that the UFO community has been devastated by forces that act on it both externally and internally. I believe without outside interference the UFO community would have broken the back of the coverup long ago. I think we could reasonably assume that the UFO community could be considered a potential competing intelligence agency and even a hostile one when viewed by intelligence agencies intent on maintaining the coverup and control of information to the public.

I have been spurred along in my thinking by critics of Operation Right To Know activities. Operation Right To Know a organization I co-founded with Mike Jamieson is dedicated to finding political solutions to what is a political problem, ie the UFO coverup. I believe that ORTK is takeing up where Donald Keyhoe of NICAP left off when he was kicked out of NICAP by CIA affiliated individuals. This well documented in Above Top Secret and Clear Intent. Donald Keyhoe was a pathfinder and he eventually realized there was a coverup and that a coverup was a political problem deserving political solutions not a scientific problem. With the ouster of Donald Keyhoe I believe that the UFO community was misdirected into scientific solutions for a scientific problem which was a false direction because if the data is altered then the science is in error. A coverup is a political problem not a scientific problem. It seems to me that after the ouster of Donald Keyhoe, Dr. Hynek came to UFO leadership and very skillfully diverted attention away from political action to scientific investigations knowing full well that the coverup was a political problem having participated in it while in the intelligence community. Dr. Hynek could very well have been a UFO mole who did much damage toward ending the UFO coverup. Its entirely possible that his close associate Dr. Vallee may also be serving to divert attention and suppress certain data.

To this date four major figures in UFOlogy have become critical of ORTK and its activities particularly public demonstrations. From a rather superficial perspective it would seem that these folks are simply voicing their particularly conservative views. What really bothers me however is that Karl Pflock of FUFOR handling investigations into the Roswell incident in congress has a high level background with the DOD and the CIA. Richard Hall is on the board of directors of FUFOR and CIA documents show that he gave out the organizational structure of NICAP to the CIA and was being considered in those documents for a security clearance. Both Karl and Richard were involved with NICAP along with people that had highlevel CIA backgrounds some of which contributed to the ouster of Donald Keyhoe and the demise of NICAP. Again

please read chapter 12 of Above Top Secret. To top things off MUFON came out against demonstrating after publishing Fred & Pflock's letters to the editor in the MUFON journal and after Richard Halls page in UFO magazine. MUFON has not allowed the publication of Mike Jamiesons rebuttal; my letter to the Editor or Larry Bryants letter in support of demonstrations and other political activity. Apparently the decision was made by Walt Andrus along with perhaps several other key individuals. MUFON should never publish only one side of a controversy without publishing opposing views in a timely manner. Even if some stuff is now published the stage has been set. Then I find out that MUFON's Corporate Secretary and MUFON board member and who is also on the board of FUFOR has a NSA background. Though he is not a critic yet of ORTK he could well have been influential in MUFONs coming down against demonstrating if the decision was made by board members of MUFON. All this just is a little too much for me to handle. There is far too much policy being made in secret and out of the public eye. UFOlogy needs to do its business in the sunshine.

Am I just getting a little paranoid here or is something going on that I still know little about. There is plenty of evidence that government agencies and intelligence agencies interfere in civilian affairs if they think issues of national security are at stake. Recently a very good article circulated in mainstream press by Stephen Tomkins that discusses the massive infiltration of the civil rights movement by army intelligence. There were even U2 flights over domestic cities. It seems there is no end to what the National Security establishment will do if they feel that national security is at stake. Then in an article by Nolan Walters he quotes a POW writer that says that the issue of POW's was covered up with the help of reporters working for the CIA. In another article by Mark Sauter the Pentagon denies that its files on POW activists are illegal. Maybe as we UFO activists have good reason to get paranoid. Given the history of interference, often illegal in civilian affairs can we in the UFO community be treated any differently? The National Science Foundation was even involved with Mustard Gas experiments on World War 2 soldiers that was covered up says a Knight Ridder article by Mark Thompson & Jim Detje

Spy agencies regularly infiltrate, disrupt and conduct counterintelligence operations against each other. If the UFO community is perceived to be a threat to national security and along with the resulting coverup of UFO's then why wouldn't they infiltrate us and direct the UFO community away from the truth and exposure of the coverup. This given their past history of meddling in civilian affairs. This then poses the question of how this would be done and by who.

It's every spys dream to infiltrate and subvert a adversaries intelligence organs at the highest levels of power. Anybody with a inkling of how the intelligence community works understands this. I think the infiltration and manipulation of the UFO community has been a piece of cake. Although many in the leadership of the UFO community will deny this possibility and will refuse to talk about it unless prodded I believe this issue must be addressed. There is much evidence available that shows that the disorder, disarray, and fragmentation of the UFO community may be to external sources of interference both internally and externally in UFO civilian affairs. The UFO community is defenceless against intrusions by the huge massive intelligence agencies. Perhaps I am the closest as anybody to becoming a spy catcher and that's pitiful.

Today we have a UFO community that has been woefully compromised and that conducts much of its most significant business out of the public eye and behind closed doors. We need UFOlogy in the sunshine and the exorcisms of proven intelligence agents from our midst. **This issue must be discussed and dealt with and the UFO leadership** and the rest of the UFO community can't afford to keep heads in the sand. I think it is fair to challenge those who may be UFO moles to explain their intelligence connections and backgrounds. I think it is fair to hold the UFO leadership to high levels of scrutiny but not persecution. Let's have at it folks, Oh yes, if case anybody asks I have sent lots of stuff and opinions but have heard nary a word back from intelligence agencies and other government organizations. I expect most ends up in the circular file.
