Le envío saludos a nombre del Dr. Steven Greer. Espero hallazgos de este email usted bien. Podemos ser detrás en Europa este verano y maravilla si usted estaba interesado en tener estudios más extensos hechos en su "poco one", que usted permitió tan graciosamente que viéramos en 2009. Propondríamos el hacer de estudios científicos y genéticos extensos, más allá del nivel hecho antes. Intentaríamos arreglar una exploración de resonancia magnética de la proyección de imagen (MRI). Usted estaría allí siempre, como el guardián del "poco one". Quisiéramos filmar y documentar el proceso entero debido a su importancia. Podríamos entonces ambos tener uso de los resultados de los estudios. Cubriríamos todos los costos. Además, pagaríamos a su instituto una concesión poder hacer esto. ¿Cuánto usted piensa es apropiado? No somos completamente positivos que seremos en su país este verano, pero si somos -- ¿podemos trabajar con usted en esto?

Recuerdos,

Dear 

I send you greetings on behalf of Dr. Steven Greer. I hope this email finds you well.

We may be back in Europe this summer and wonder if you were interested in having more extensive studies done on your "little one", which you so graciously allowed us to see in 2009.

We would propose doing extensive scientific and genetic studies, past the level done before. We would try to arrange an magnetic resonance imaging scan (MRI). You would be in attendance at all times, as the custodian of the "little one". We would like to film and document the whole process due to its importance. We could then both have use of the results of the studies.

We would cover all expenses. In addition, we would pay your institute a grant for being able to do this. How much do you think is appropriate?

We are not fully positive that we will be in your country this summer, but if we are -- may we work with you on this?

Best regards,

 MD
