Ted,

EXTREME CLOSE HOLD.

That's a good direction, in my opinion. I will not answer him.

Both Koontz and Al Collins are also coming on to Bedini as well. So it appears that, from tapping the phonecons between John and I, that the Cabal is very seriously worried by the new invention we are preparing to patent (you did not hear this; officially it "does not exist").

Note also that Newman is being thrust out to the front again, and the j-honkeys like Park are being stirred up to once again get up on the soap box, including in the APS.. There are also a couple other major suppression moves ongoing, all now beginning to fit the same pattern. I believe we may have figured out the "game".

Anyway, let me caution you very strongly to be on your guard on the Collins thing. If a working device were to be delivered for testing, be forewarned that it can still be a special kind of deliberate trap. Be very sure to go into (1) the principles by which it works, and (2) the fact that it actually is a legitimate independent invention, with at least a separate patent application filed on it if there is no issued patent. It is very close to something I already know about, and may be the same thing. The suspicious thing is that all these moves and a couple other things seem to be very well coordinated with each other and part of a combined game. They are also overlaid synchronously with something of extremely high security classification which I cannot discuss.

But there's an old saying. If it walks like a goose, is colored like a goose, has wings like a goose, honks like a goose, and flies like a goose, it's probably a goose.

If I'm right, this particular "game" or caper is designed to again go after all the "good guys" who are peceived to be any kind of serious threat that might actually get vacuum energy on the market.

Please watch your backside. END OF EXTREME CLOSE HOLD.

Best wishes,

Subject: Re: Overunity device

Dear [REDACTED] Thank you for the introduction to Al and the very kind words. I will contact him and see where it goes. As for Koontz, your call, as I will bow out of his agenda. I am sure you have a better sense of the subtleties of what he wants than I do and he does seem to be smoozing for information.
