Tony: Draft- feel free to edit. Best, Steve

FOREWARD

For over 30 years [redacted] as brought to the world a wealth of information on advanced physics, energy from the vacuum and related subjects. This book, while first published in 1984, is as timely as ever since it focuses on scalar electromagnetic technologies and their application in space weapons.

The reader must first understand that there is an entire area of physics hidden from the mainstream scientific community and that resides in top-secret Unacknowledged Special Access Projects (USAPs). These projects, generally run by a hybrid or consortium of military, intelligence and corporate interests are, as the name states, UNACKNOWLEDGED to anyone not "read into", or cleared to know about, the operation. This means that even if you are the President of the United States, you may not- and usually do not- know about them.

Scalar, or longitudinal, electromagnetic systems operate outside of the conventional physics of wave and particle physics that rule what most think about when light, radio waves and the like come to mind. Scalar systems are not constrained by the speed of light constant and behave according to the laws of a new physics that include trans-dimensional technologies, thought-technology interface, electro-magneto-gravitic systems (so-called "anti-gravity") , among others. While these technologies could be used (and have been...) for healing, interstellar communication , and other useful purposes, they have, alas, been weaponized into very destructive systems. As usual, humans have found a way to bend any new technology to the purpose of War.

Experimentation with these technologies goes back for decades- and most likely over 100 years- and by the 1940s and 1950s had become highly classified in these USAPs.

The Strategic Defense Initiative (SDI, or Star Wars) always had at its core an extremely close-hold top secret USAP that was tasked with using such scalar electromagnetic systems to track, target and bring down Extraterrestrial Vehicles (ETVs). A US Air Force Colonel explicitly told me that he personally put together briefings for Presidents Carter and mainly Reagan and played the "Alien" card to get SDI funding. He admitted there was clearly no threat from these ET visitors, but they craftily played on human fear and xenophobia to convince certain people that we

needed SDI- and not just to take out Soviet ICBMs. (Inter-Continental Ballistic Missiles)

Indeed one Disclosure Project military witness admits to working on such systems as far back as the early and mid-1960s and that by 1965 the U.S. had platforms in space to target ET craft, which he personally witnessed taking down ET objects.

While most may be astonished by such statements, it should be remembered that even the so-called Roswell event of 1947 was likely an early scalar hit: An officially released FBI memo states that the craft that crashed there perhaps did so after a new "radar" system¹ was installed. I doubt it was a conventional radar system, but rather was an early scalar weapon system that surprised the visitors who were doing reconnaissance at what was then the only atomic bomb squadron on Earth. While there is no real evidence these ET visitors are hostile (if they were, it would have ALL been over around the time we detonated the first atomic bomb!) there is plenty of evidence that the ETs are very concerned with human war-making and threat we may pose to ourselves, the Earth- and other peaceful planets in space.

No less a figure than the inventor of the rocket, Werner Von Braun, warned on his death-bed that those who want endless war would go from the Cold War with the USSR to "nations of concern" to global terrorism - and finally the false alien threat from outer space. He warned that this was all a hoax and it was, as President Eisenhower alerted us in his last address to the nation, the dangerous machinations of the "military-industrial complex" bent on control and domination. (See www.SiriusDisclosure.com and the testimony of Carol Rosin, and others.)

While it is late in the game, we can still stop the madness at the root of SDI- by alerting the public and demanding that our governments only use space for peaceful purposes. But first we must get the out-of-control USAPs under control.

USAPs tasked with scalar, gravity-control and related technologies are so compartmentalized and secret that they- and their corporate interests- operate without the consent of the people, the people's representative and the President.

From the 1950s until today, the "military-industrial complex" has morphed into a hidden global secret government that does as it wishes. This group is planning to hoax an "Alien Threat" so that it can unite the world around an entrenched militaristic group.

At least 60 years in the planning, this on-going covert coup of the world's governments and interests is all but complete. But they cannot succeed if we the people are awake and expose this corrupt folly for what it is.

This is why we must all take responsibility to learn about what SDI really is, how scalar systems work- and then come together to expose the truth and change directions.

We can choose a world of abundant and infinite energy, faster than the speed of light communication and travel, peace and prosperity- or certain destruction. In this sense we are the Last Generation and the First Generation. The Last Generation to fix the long-simmering human problem of war, conflict and corruption --and the First Generation to usher in a new time of world and Universal Peace. The choice is ours- and there is no more time for later Generations to make it. It is time for us to act.
