I've had time to review the two documents you forwarded with this e-mail. I have learned (over the years) to read between lines, and what is not said. Your documents are somewhat vague and might enjoy clarification. More of that later.

My work with MRU and Seal Corp. involved a number of different aspects of the paranormal, mostly around physical phenomena. Where did you see reference to my work with "alien artifacts?" It's not untrue, of course, just a bit out of my normal realm of study. My Masters was in Solid State Physics, so I was frequently asked to examine unknown materials.

Steven Greer is a Medical Doctor? Where does his funding occur, and who pays your salary? I note that your location is in California, while Dr. Greer is located in Greenwood, VA? What does "Senior Researcher" mean in the relationship? See, even after 20 years I still fall into old, bad habits.. ha ha

Some perspectives would be helpful in knowing how to respond to your own questions and other disclosures I might consider. For example, I also worked on the "Mind Wars" project (1969-76), to include other "forms" of possible alien contact. Man has another sensory input in the 0.3-3.0 GHz, low amplitude and directly onto the brain itself.

How does one "share" these concepts to the general public? www [REDACTED]? "Cultural viruses" (belief systems, like your own worldviews) are now likened to forms of drug addiction. Worldviews are not real, have nothing to do with "reality," and could be seen as limitations to the possibilities. There's more going on here than "aliens."

At one level, your Army studies bridged new technologies that have yet to be disclosed to general public. Why? Like giving "economic freedom" to everyone, what would happen next? Conspires? Of course there are conspirers. How could there NOT be agendas? If you can see it in your "mind's eye," then it is "real." All else is illusion, just like the movie "Jacob's Ladder."

How can I help you?

Subject: Research question

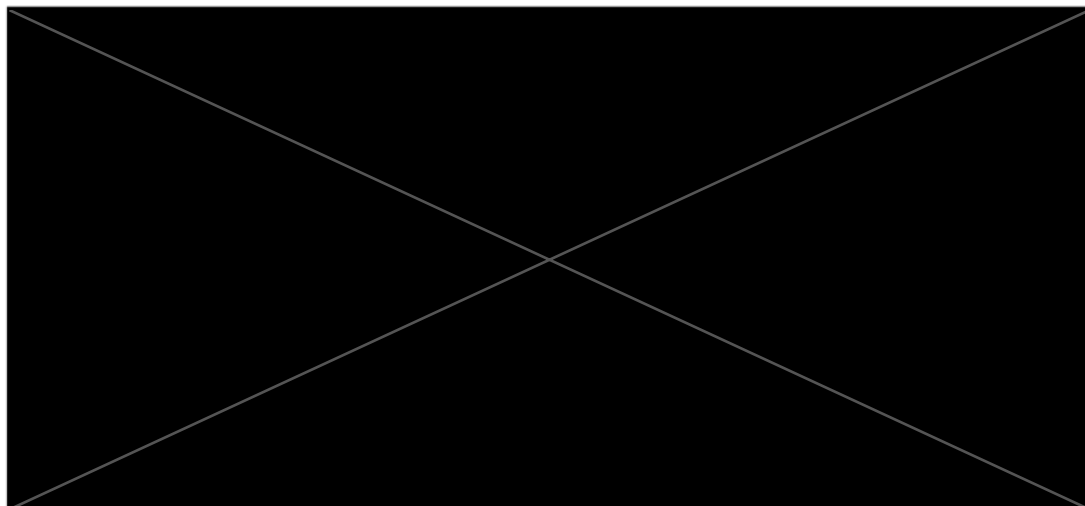

Dear [REDACTED]r,

I am writing on behalf of Dr. Steven Greer, Director of CSETI (Center for the Study of Extraterrestrial Intelligence) and Disclosure News Programming. I am Senior Researcher working with him on a new project to gather and archive the testimony of UFO witnesses world wide. Currently, more than 200 highly credible military/government-connected witnesses have come forward as part of this project. The Witness Archive Project is designed to preserve first-hand accounts and provide evidence for an upcoming coordinated public disclosure on the UFO topic. Please see the attached information for more details.

We were interested in talking to you about your 1969 viewing at the U. of Chicago of an artifact through an electron microscope that was believed to be a fragment from a UFO. Could I give you a call to discuss this? I am hoping you will send me your phone number so I could follow up with a call.

I look forward to hearing from you. Thank you.

Sincerely,

<DIV>
