Dear Dr. Greer, CSETI, and [REDACTED]

The following is a story I received from a Navy Aircrew member after I sent him an email. Please post the whole story on your web site.
(AW is an acronym meaning: Anti-Submarine Warfare)

Thanks,

C

I was in VP-50 from '69-'73 as a AW crew member.
I noticed you mentioned a UFO incident in Egypt.
What did you see?

Thanks,

[REDACTED]

Hi Charles.

We were on deployment at NAS Sigonella. I was a SS3. At the time of the incident, we were flying surveillance at night right off the coast of Egypt. An E2 was about 70 miles north of us. A large blob of multi colored lights came up to us and stayed off of our starboard wing as we made three turns to the left. The fleet and E3 had this object on radar. I had nothing except the air search radars from the coast on ESM. Every one on board my aircraft saw it except me. I never looked out the window. We all thought initially it was a mig. It left us and flew north and up past the E2. They saw it visually. Then it was gone. Shortly afterward the mission was called off and we were ordered to return. When we de briefed we were told not to say anything about it to anybody.

That's the short version.

I did advise my close friends/roommates, who were also AW's, to prepare them for the unexpected for safety's sake. Since 1977, I made contact with a few old fellow VP-5 buddies and they remembered me coming back from that mission and informing them of that incident. The crew I flew with that night was not my usual crew and I don't remember who else was on that mission with me. I just went on with the deployment and didn't bring the subject up for years. I wish someone else from that mission would contact me about it though. Some of the details are a little fuzzy after all these years. I would like to hear from them what they thought of the whole affair.

[REDACTED]
former VP50 / VP5 AW3. 1974-78.

Hi [REDACTED]
Thanks for the "short version". If there is a "long version", then go ahead and bend my ear, I like long stories, especially when they are about UFO's. I have taken a special interest in this subject over the years and have

My wife is a native NJ'ite. She says Saddle Brook is near route 80 andthe Garden State Parkway. I have lived in NJ from June 92 to present. I am from California, Missouri, Pennsylvania, and North Carolina inthat order. Have actually lived in 54 houses in my 52 years. My wife isfrom Summit NJ.

Thanks.

Saddle Brook is just not what it used to be. I remember dirt roads and lots of trees and woods to play in as a kid. Now, its concrete, houses, and too many people....sad to see your hometown disappear, you know? I still have family in the area and keep in touch with some friends there.

The UFO story details are interesting little things. We had two guys fly with us that flight who were not in our squadron. They were probably naval intelligence and were probably there to see what was on the decks of the Russian freighters going into the area. I never did find out. They seemed as stunned and bewildered as the rest of the crew trying to figure out what the heck that was off our wing tip that night. I remember looking at the debrief notes of the pilots and other officers as we were turned them in. The pilot, (I wish I could remember who it was) , instead of writing a narrative, wrote in big letters, "U.F.O." On a piece of lined paper and turned that in. I remember joking that he can't do that. Oh well.

Let me know if you ever get down to my old stomping grounds.

: [REDACTED] rg

They specialize in collecting military and government stories about UFO's.
Could I send your story to them?

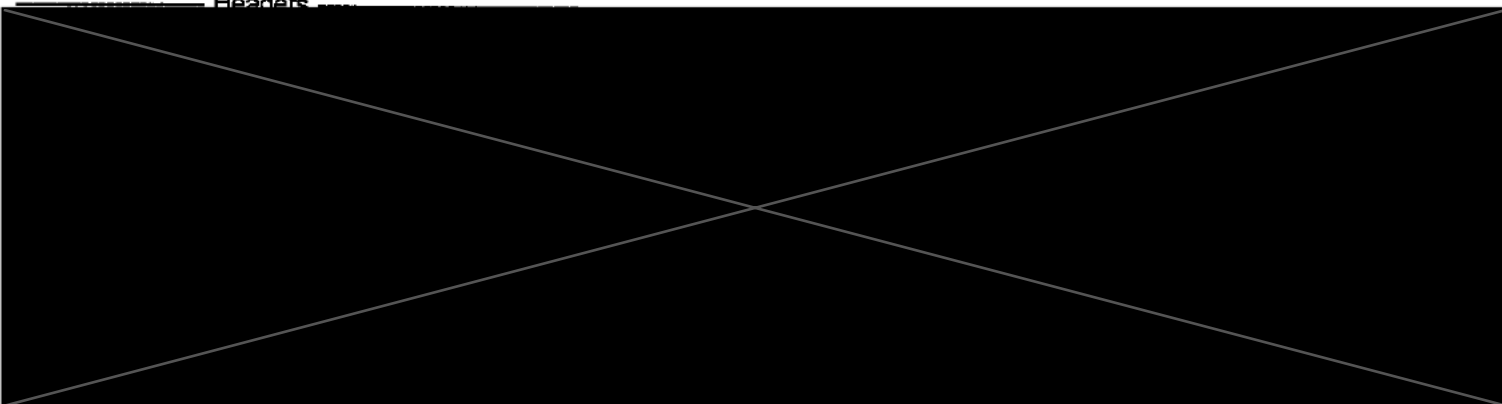

Thanks,
(AW3 Courson)
