Dr, Greer,

Thank you for your diligence over the last few decades. The level of subversion is not a surprise, any longer.

Since the timeline is congruent with my experience, I am reaching out. After a progression of referrals, I landed at the Special White VA line, after a referral to the VA. Though I made clear I didn't know the projects name, I was part of the tail end of that MK-Ultra in the early 1990s. Although proof can be difficult to obtain, recent disclosures and DARPA's currently battlefield enhancements programs are alive and well advertised, I thought I would reach out to

Your team. Unnerving are those who became interested me over the last year. I completed two interviews with the human rights commission (Scientology I gathered), but they are only interested in certain details, but not me.

Born to a hippy mom in April of 1971, and on government healthcare (welfare) my whole adolescent life, I was the product of those experiments. The US Marines recruited in me in my Sophomore / Jr. year of High School. As an avid yacht racer, I was asked to report on the Russian Sailboat in Bellingham, WA; during Perestroika. Although I avoided most pictures taken, I was prominently featured on the cover of the Harold, the paper I also delivered after school. I took a year after high school and entered RCMD / San Diego in Feb of 1991. Much to tell...

My exit memories are of a warrant officer's electrocution chair, in a small room off the south hallway of the depot's base infirmary.

Subsequently, when almost enlisting in the Army, in 2009; I ask only to be placed where I left off. I enlisted in 91 as Force Recon. In 2009 the Army recruiter got off the phone and asked me, "what did you do"? He said his pentagon boss said, give him what he wants... I said, "what". The recruiter said your papers came back Psy-Ops CI. (High Empathy-No Prejudice-Morale Flexibility)

My mom warned me about it, but couldn't ever say what it was or why. I didn't know what I was agreeing too at 19, after I got into boot camp. They hid our programs in the base Med-platoon; where they keep you indefinitely. The only strong cross references I could that is of relevance is the Major at RCMD-San Diego in 1991. He is the same Blackman that is the current face of the DIA.
