Dear 
Thank you for your very informative email.

I know great healing can occur through spirit and have seen it happen - even in the ER!

You are correct about your dad- he was not majestic but certainly knew some of them - perhaps unaware that he did...this is not uncommon among industrialists.

I wish I could have known your father- he sounds quite remarkable. David and Sandy have been wonderful here in Joshua Tree!

We are headed to AZ saturday then back east monday. If you happen to be in the DC or VA areas let me know- It would be a pleasure to discuss the energy project further with you, as well as the situation with John.

It would be wonderful to see your electric boats running on a new energy charging system- off the grid! I hope this scientists who has been freed from his national security restrictions can come through with a major breakthrough soon...

It was a pleasure meeting you and hope we can work together in the near future to advance our civilization and create a new way of living on the Earth!

Best always,

Steven M. Greer MD

Dear Steve,

I was very pleased to come to your meeting Friday in Costa Mesa. My brother  sent me a link to your UTube talk and I had already listened to that. Your talk was pretty much the same: which is a good thing I

heard again the part about ETs being loving and basically being able to do all the stuff we know is possible because Jesus did it and [REDACTED] did a lot of it too.

I don't think my dad was part of the Majestics because he was a blabber mouth and wouldn't have been able to keep secrets. In fact he told me, one summer night at our home in Switzerland, when I was fifteen, (he was teaching me about the stars) that if a space ship landed on the lawn, he would go with the visitors. He said he knew he probably would never see us again and he would miss us but he would learn so much. Afterwards he took pictures of two flying saucers that followed his airplane. And, remember, he was the one who came up with the idea, in 1940 that one day we would be able to dematerialize and travel as easily as making a call in a phone booth. That idea was the origin of the movie called the Fly.

I have been studying Christian Science for years and focusing on the ABSOLUTE Truth that the infinite Mind is All –in-all and is the 'Be'ing, the only ONE that I am one with. And using Mental engineering to shut out the RELATIVE (which is all the rest that isn't absolute.) I teach Sunday School to middle school children and have been studying the mental warfare the Romans used to get people back in toe in 325AD when they established the HOLY ROMAN CATHOLIC EMPIRE and exchanged the top god in the roman panoply of gods Jupiter with, are you ready???, Jesus. And said that Jesus was now top god. And the vestal virgins and priests of the temples were still getting the money from the people. It is sad but true then that IF IF IF you were doing any healing like Jesus (that was how you proved that you were a real Christian – really really loving- ...by healing the sick) they put you on the rack to see if you were lying. (Strange that healing the sick through prayer went out of fashion at that time. Tsk.) The dark ages and keeping the people ignorant was how they controlled people. But you already know all that.

What I knew was that the pictures of the flying saucers that followed Dad's airplane were never acknowledged by the pentagon. But what is very sad and creepy is that after your meeting I called my brother John. John has studied ETs, he is an acknowledged expert on ETs but he says he has never personally seen one. He has been in great pain for a couple of years and I called to tell him about Suzy London who is a well known healer to suggest that he call her. He doesn't really talk to me ever. I'm not sure why but it's like two magnets that deflect. He is full of hatred and bitterness. (now I know why he never saw an ET, thanks to your talk on Friday.) I'm bold and if I see someone who needs help I'll do my best to help. He knows Suzy, she helped him with his feet years ago. I told him that you said to say hello. He said, Oh thanks. Then I said, Hey, John, I never knew that there was such a powerful organization called the Majestics that was keeping this all secret, what do you know about them. He abruptly asked me for the telephone number of Suzy and cut the conversation off.

[REDACTED] was part of a group in Sedona. I went to some of their meetings and we talked about extra terrestrials and astral bodies, photon bodies and causal bodies. I had been told to fear extraterrestrials by this group, and I basically did a Christian Science treatment on all the beings who came into my consciousness reassured them that there was nothing to fear, that the divine mind provided infinitely for all his creatures and I certainly was not afraid because the Infinite I AM only created GOOD and all the rest is a mental construct that only has power if YOU give it life. I have never experienced any fear as a result.

I spent thirty years of my life teaching mothers and fathers and nurses and doctors about breastfeeding and was the first international board certified lactation consultant in Europe. I founded the Italian La Lech League and have basically using my show business background to tell doctors that they have to stop disseminating misinformation and pushing manmade food for babies. I worked with WHO in Geneva in setting up training to get the world turned around in that arena. Using Bill Lear chutzpah and Christian Science prayer to get into hospitals, work with health professionals, change and rewrite protocols and stop the nonsense.

Right now i am solving the problem of pollution one boat at a time. I, of course am very interested in not only having access to this new energy source for our boats, but also in offering the expertise of Terry my husband who is on a list of creative problem solvers at Boeing and does a lot of the really intricate pattern work and development. He certainly can help as can others on our team here at Lear Electric Boats.

Our Dealer in Maryland is in California, Maryland. He will be getting a new Learboat in a couple of weeks. I'm sure he would love to show it to you, as would I, if you were here. His telephone number is 4435369082. His name is Ron Olsen.

So thank you so much for giving me your card. I wasn't able to come on Saturday. Spent time pouring over your book Contact and taking notes.

I'm working on a project of how to get Mary Baker Eddy better known. Apparently 80% of the public don't know who she is or what she discovered. And of course it is clear that fear and ridicule have prevented people from getting involved with Christian Scientists. It is a sales technique called F.U.D. Fear, uncertainty and doubt. The best way to win over a competitor who has better quality than you do.

That is all for now. Good to meet you, I will do what I can to help.

All the best,

p.s. here is a list of websites of things that I have done.
