Believe he means [REDACTED], not [REDACTED]

Have heard of this tape before, though not from someone who had a copy.

> Somewhere I was reading that [REDACTED] [REDACTED], was asked if he saw
>spacecraft on the moon and he denied it.
> When I was in the USAF I was working at a communications sought in
>north
>Florida and some one gave me a tape of the mission taped off the air at
>their monitoring a UHF frequency that the AF was down linking from the
>surface of the moon.
> What I remember was that Glen did not say sir anything, He said there
>are two craft parked on the other side of the crater and they appear to
>be about a football field long. he repeated the statement and he also
>said that they were parked nose to nose and that they had alders
>extended to the ground but that he did not see anyone around.
> If you check you will find that the moon trip was cut short and they
>got in a big hurry to leave and did cut the mission short.
> I told a few people about the tape that I had at my house and that
>there was no mistaking his voice, and also that Houston and gadded were
>talking to him a little, and that there was not much more said during
>the mission, however it is real interesting that scramblers were
>installed on the shuttles before the next flight and have been there and
>are used ever sense.
> You can tell me what ever you want but my house strangely burned soon
>after that conversation and fire investigators and arson investigators
>for the insurance company were not able to find a cause.

> By the way the fire started on the format porch of a one car garage
>part of the house, that was my hobby shop. We lost all my toys, mainly
>about 250,000 worth of surplus electronics. Mostly communications
>equipment, ground monitoring, mobil telephone service equipment, all my
>on air recorders, all receive preselecs, my racks, all my schematics,
>and some real net comm. receivers as well as all my tapes collected for
>about fifteen years with a lot of real neat air to ground conversations
>mostly from Edward's AFB which is about twenty miles north from where we
>lived at the time in a place called Sun Village.

> The fact that we could observe shuttle landings from the skylight
>hatch on the roof of our house with a telescope directly will probably
>let you know how clear the conversations were not only from the A/C but
>from the tower at Edward's as well as a lot of range traffic in the high
>altitude supersonic corridor.

> Why was I able to monitor , maybe because I was first a Ground Radio
>repair men, and later before getting out a radio relay repair man.

> I still am a communications specialist with an FCC general operators
>licensee (this is the licensee that authorizes me to work on about
>every type of communications equipment there is.

> There are so many very interesting conversations that happen almost
>daily that happen because the air vehicles sometimes have problems and
>the emergency support vehicles for the most part do not have scramblers
>and must talk un encrypted.

> Oh by the way I no longer tape anything, I really did not like loosing
>all my toys and although I am sending this letter with full knowledge
>that because it is being sent with no encryption because your sceti
>sight has no certificate, either a mistake or you want the government
>people and who ever to be able to copy your data by pulling it off using
>your digital address for the start and stop flag and not needing to be
>anywhere near you, and simply being passive on the system wither through
>the sat link, any number of point to point RF links, as well as a few
>tropo scatter links in use.

>

>

> I have tried to find out if there are any groups in my area, but
>have been unable to get through, I keep getting (message returned not
>delivered).
