Mr. Walter Ferguson
General Manager Wackenhut Test Site Security Group
C/O Mr. Richard Davis
P.O. Box 96027
Las Vegas Nevada 89193-1838

Re: Telephone conversations disclosure/inquiry with Mr. Richard Davis beginning October 6, 1997 relative to the A.R. V. [Alien Reproduction Vehicle] "Flux Liner" Technology

Dear Mr. Ferguson:

The recent statements made by myself concerning Area-51 Test site security matters to your associate Mr. Davis, while deliberately guarded and limited as to sources and extent of content, were 100% accurate as to stated points of fact. We do not expect that either yourself or your firm (For 'need to know reasons') will understand the relevancy of the engineering or physics terms described herein. We do expect that this document will reach those at the site who do understand the technology and its limitless implications.

For the record, the Wackenhut organization is to my knowledge in no way involved or responsible for any breaches of security during the fact finding course of our long investigation. Moreover, to our knowledge, No unlawful disclosures (Example— "Pentagon Papers") or U.S. espionage statutes have been violated.

We have been in possession of scaled A.R.V. engineering cutaways and possibly highly classified data about same for a considerable number of years. During that time, extensive scientific analysis by my associates and myself have allowed us to identify the vehicle components and their respective electrical (read physics) functions. The multi-layered security protective, inaccurate physics chaff that emanated from the A.R.V. test site players since 1990 has now been analytically separated from our detailed overview of the operational engineering wheat of this very black bird.

Hard factual verification of this domestic birds reality of existence has also come during these years from a number of sources within the military, intelligence and aerospace community. This includes both still photos and literally tens of thousands of frames of film and video of A.R.V. in flight. These were recorded both in the daylight and evening hours near or at the test site by many different individuals. Further conclusive proof of the history of A.R.V.'s development came from our direct contacts of long standing with Colonel Phillip Corso (U.S.

Army, retired—author of "The Day After Roswell" and others.

This situation, combined with an exponentially accelerating interest by the world's aerospace and physics community into negating gravitation, free energy and time control research,

convinces us that an absolute potential now exists for a CATASTROPHIC white world breakthrough in resolute physics on these subjects, or better put subject. Based on our knowledge and understanding, we calculate that excluding our team, this Promethean discovery is very probably only 18 to 24 months away in linear (read flat) time. This is widely reflected today in the aerospace science and research physics or academic literature of the white world. (See attached exhibits 1 through 8) Literally nothing in the planets financial and intelligence communities with which I am well acquainted, indicates that ANY preparation is being made for the potential, cataclysmic economic shock of this near term future reality on the worlds financial markets. In an unprepared for discovery scenario there can be no bottom to the fall. (See Exhibit 9).

Most important, I am a long time and very strong advocate of the New World Order's (Read CFR, Trilaterals, et al.) desires for the economic stability of a capitalism based united world government. Our global economic studies clearly indicate that, properly and clandestinely marketed, A.R.V.'s technology could quietly and rapidly achieve that needed objective without the Machiavellian created chaos of fabricated nuclear terrorism. It is not necessary to create global martial law in order to realize by force this age old dream upon mankind. Our reasoning indicates a far better way already exists. Macro accelerated A.R.V. pre-extraterrestrial, transitional industrial meganomics strikes me as a concept our nation's forefathers would say makes common sense for stabilizing over the next three years the revolutionary time control and cost free terrawatt energy domains of the twenty first century. Potentially once the technology white worlds, it can likely, reverse quickly the global warming by eliminating the carbon dioxide emissions from petroleum and coal products. That is one of the primary reasons for this inquiry as we view this as an extremely serious problem for the planet that requires a rapid permanent technological solution. Political manipulations at the U.N. level simply cannot accomplish this global ecological task and that is becoming abundantly clear in our planet's increasing climatic heating. (See Exhibit #10)

Force One Ltd.'s security firm legally controls the extensive and well organized field intelligence and scientific research deductions and test data made to date on this matter. In the course of assembling our programs research and analysis, we have taken very serious precautions to protect both ourselves and the strategic national security issues most

2

obviously involved. Defeating remote viewing and forward or past time scanning is but a part of our security agenda. (See attached exhibit #11)

To illustrate one example of this hidden tripwire reality—all of the source files, physics and reverse engineering data are deposited on sealed "RSA" public key encrypted CD ROM's with, among trusted others, my long time close friend and legal business associate, Ramsey Clark Esq., the former Attorney General of the United States.

This secure encoded material is now in the form of a 700-plus page publicly understandable, abundantly illustrated science report book titled "SUPREME COSMIC SECRET", subtitled

'A.R.V.—The U.S. Governments Back Engineering of the UFO.' There is NO, and I repeat, NO intention of this analytical document ever being commercially published as it was not prepared with that purpose in mind, though selling it would be a 'big, easy' piece of cake. The exposing of this situation in any way does not serve our plans or interest either, and this severely understates the case..

However, any attack deemed threatening to our program and or it's participants would immediately trigger the data being freely released simultaneously at multiple unconnected points on the Internet and other media where some of my associates in this venture and I enjoy high credibility. We firmly believe we are correct in our intelligence and scientific evaluations of the 'How to and Why' of the gravitational nullification physics and engineering technology involved. Therefore, by our security reasoning, such a release would be far more than just counter productive to all concerned. As such, we are seeking only cooperation—not confrontation...

The primary objective of cooperation that we are concerned with at this time in this combined gray disclosure notice and inquiry, is legally protecting our commercial global intellectual patent pending proprietary rights. We are seeking through your offices and others a modus vivendi with your employers in order to white world the technology in this decade without ANY economic destabilization of the world's energy, transport, and financial interests. These U.S. and foreign pending R.A.M. (Replication Alien Machine) patents are technically and legally well disguised to conceal the proprietary physics of the system's functions. Our "Prior Art" secret legal disclosures to our patent attorneys commenced in 1989. We are prepared to rigorously defend them, should that be required. However, we are also prepared to handsomely accommodate the scientists, engineers, and program managers who certainly deserve well earned recognition for their beyond brilliant efforts. This would also include the Wackenhut

company for all related future projects and programs.

To reiterate, we are well aware of the potentially disastrous global consequences posed by an unplanned for release of the transfinite energy and time control manipulation anomalies or paradoxes attendant in the operational function of the ARV system. Moreover, a macro-econometric model that vigorously accelerates the united world order plans without any need for the totalitarianism caused by the establishment's systematic political deployment of a "Cointelpro" created nuclear terrorism, is theoretically feasible. This global political/economic solution can be made available on a reasonable timeline which we propose to supply for moderate costs. Other sentient star systems have obviously done it and so will this small planet's rapidly evolving sphere of life force in the very near future. Moreover, it can be secretly accomplished in twenty four months without any leaking of the technology until all the major banking, energy and transport players are financially insured and protected against any collapse of the system following the announcement. We firmly believe the world markets

can be made to “Ho Hum” at announcement, and then surge rather incredibly upward for a very long time.

In order to facilitate and otherwise attempt to avoid the drawn out poker-like security related or legal maneuvers usually attendant in such delicate tactically driven negotiations; should the powers concerned be interested in serious, no nonsense discussions of how we might mutually serve the national interest in this matter, please promptly advise what degree of disclosure by us will be required at the meeting and decision level in order for this inquiry to be seriously considered. We are not known for bluffing in the strategic sense of the word.

Let me try to clearly try to illustrate this point. The breaches of security regarding A.R.V. occurred inadvertently first in 1988 at Norton A.F.B.. This major breach followed by our releasing for publication two very discreet and undescribed cut-away art renderings of A.R.V. in 1991. They were in William Cooper’s book “Behold A Pale Horse”, page 406, and William Hamilton’s book “Cosmic Top Secret” page 101. This was followed again on 1994 in the March cover story issue of “Popular Science” page 57 with a misinformation rendered quasi engineering drawing.

Our purpose in that time frame was only to attempt to determine A.R.V.’s actual existence from contacts which resulted as anticipated from these carefully chosen leaks. Once the hard “humint” reality of the vehicle design was satisfied to our minds, no further leaks were ever again allowed. We instead then focused our full attention at back engineering what was

4

creditably admitted to be reversed engineering of an extraterrestrial starship shuttlecraft.

The good news for the readers to whom this document is directed is that at this point in time our group has wittingly become for A.R.V.’s security, it’s primary debunker. Phil Klass couldn’t do better but he doesn’t have our collective motivation(s), our intelligence resources and scientific analysis capabilities, or our collective connections where it counts. The breaches of the A.R.V. security that allowed this unique and hopefully singular situation to now exist, concerns our long term protective senses as much as it does yours.

Therefore, this disclosure offer may include divulgence of systems description and function parameters such as total number of capacitors required for operation and control, dielectric materials and their constant values in voltage before state change, sequences multiplying voltage in cyclic parallel charge/series discharge levels, switching system, main order “antenna” coil as to materials, number of turns, dielectric strength prior to state change, flux field(s) frequencies, their rotation vectors and description, methods of power supply and type of propulsion generated, flight controls, flat time declination rate and voltage level at state change, etc. etc. etc.

I am enclosing these original brief and discrete cutaways of ARV (Exhibit 12 a & b) in comparison to an identical design (Exhibit 13) of ARV in daylight flight over Nellis—Sept 94, & (Exhibit 14), a very similar planform design which is believed due to the small blackhole

like indications of visual forward time scanning around the cupola, to be extraterrestrial. Detailed modular TEST RIG engineering design and ARV flight systems drawings are available under mutual exchanged non-disclosure agreements. Additionally we do not believe Bob Lazar's cockamamie "Unobtainium-115" anti-matter, gravity wave amplifier story is anything but ingenious deliberate disinformation. We believe for good reason it was intended like William Uhouse's "Jarod II" simulator tales, to direct foreign intelligence and scientific investigations away from the truth.

Our physics understanding of the fundamental principles of electro-gravitational field envelope nullification technology is totally related to the U.F.O reversed engineering of the A.R.V. design. A design which by its obvious internal electrical function parameters has many, many anecdotal confirming physics supports in the contemporary literature of the last 50 years. ARV's engineering is further totally corroborated by numerous comparative CAD/CAM Form Follows Function U.F.O. disk analyses of the ergonomic vs. A.R.V. propulsive flux drive components design utility. Additionally, the systems analysis is further graphically supported

5

by extensive visual study of A.R.V. flight tests recordings. This testing, which due to the integrally related voltage levels to x-ray and gamma radiation caused ionization(s) so colorfully demonstrated in both daylight and night flights is most definitely not being considered as just clever optically crafted disinformazia, as they totally confirm our physics theories. Our experiments, without going into our internally classified details, clearly indicate that damping or perturbing the metric correctly is what the high voltage electrical amplification and field envelope control engineering of A.R V. is all about.

Additionally, I am attaching a current curriculum vitae which Mr. Clark will readily attest is not only correct, but is in direct adverse conflict with the despicable K.G.B. like disinformation and destabilization(s) files on me created by the F.B.I.'s still functioning "Cointelpro" operations. These covert operations were taken in response to my exposes of some of their major crimes over the years while working on ultra black (read untraceable) contracts for other departments and agencies of our government. Agencies who unlike the bureau bullies were very concerned about their credibility and public images. (See Exhibit 15)

I am very familiar with the outstanding corporate history of Wackenhut and like your former Vegas compatriots at INTERTEL, recommend that on the issue of A.R.V. and Area-51, we don't let our respective feelings about the bureau adversely color this inquiry. Mr. Clark is on the historical record about my skills as an intuitive, scientific investigator and as a strict construction constitutionalist. For the world to remain free, someone has to watch the watchers or there is little if any accountability on black projects by government. Most especially this one.

A good recent example of Force One Ltd's scientific and investigative skills is depicted in the nationally acclaimed film documentary enclosed on video with this document, titled, "Waco — The Rules of Engagement". A similar film documentary depicting the proposed plan for

global marketing of the R.A.M./A.R.V. technology is now in production for an “Eyes Only” briefing to the Joint Chiefs of Staff and CFR leadership.

We firmly believe that the white worlding of this technology is absolutely inevitable. Proper historical analogies to this situation can be found at Kitty Hawk and Spindletop, not to mention Galileo.

How the white worlding of the A.R.V. technology is ultimately accomplished is precisely what this disclosure and inquiry is all about. We believe we understand the military’s original strategic rationale for the extreme secrecy that’s been long applied to this matter. But it’s

6

50 years old and we are now living in a very different world where little is secret and the rate of technological change is on a vertical exponential acceleration curve. Public opinion polls taken globally show that over 50% of the world’s population believe the planet is being visited by E.B.E.’s. That politically means –There Here!

Colonel Corso’s recent book was a crystallizing watershed event on this esoteric subject as was Paul R. Hills “Unconventional Flying Objects” whose manuscript we helped cause to be published. Denying this reality, no matter how ingrained it’s secrecy has become to insiders over the years, is an affront to the good common sense of the American taxpayers who have been consistently lied to for 50 years while unknowingly bearing it’s costly, well concealed burden. We never want to see those lies exposed publicly as it would very likely do far more harm than good at this time in history.

We have discussed this situation over the past five years with two apparently key insiders on the deep black funding and development of A.R.V.. For the time being, they will remain anonymous per my agreement with them to keep their identities secret until we were politically and scientifically ready to disclose this matter to the responsible parties. This document begins the commencement of our agreement and they are being so informed. Creation of a cosmic Watergate or mega scale “Yellowfruit” like affair is not our objective in the least as our group is also legally represented by both a current and former D.O.D. ‘ JAG’ Judge.

We would therefore recommend in the strongest possible way that this matter not be put in a “nut file”, as that will most surely come to haunt it’s maker in spades. Such “Closing the barn door” silliness as surveillance whether humint or elint is not required. It will be opposed strongly, and can only serve to jeopardize the potential for friendly discussions and, we have the same capabilities. We (read myself in particular) are all deeply concerned about the national security issues extant, and have nothing to hide except the level of our knowledge about this arcane subject

What we are requesting is simple. It is our declared intent, unless righteously persuaded otherwise to the logical satisfaction of myself and Mr. Clark, to white world the A.R.V. technology in the near term. We would like to meet with and discuss this objective in a spirit of friendship and cooperation with those in control of the of the A.R.V. system and related development(s) program. We want to see the bird(s) and the birds alone as there is at this

juncture very little interest in meeting E.B.E.s as we are not currently concerned with their agenda.

7

In essence, this is a formal on the record request for scientific, economic and political cooperation. How best to serve the national interests in light of the situation at hand is the primary WHY behind this disclosure about A.R.V. a.k.a. "Baby Bear", "Mama Bear" or "Papa Bear".

We are prepared to identify all of our Knights Temporal members when we are given good reason to believe matters indicate that this level of disclosure would be of positive benefit to all concerned. Excluding myself and a few others, all hold or held recently "TOP SECRET" U.S. Government clearances relative to either military intelligence or military aerospace developments.

They are all prominent in their respective aerospace and/or physics disciplines. They are all honorable and patriotic Americans of an independent bi-partisan persuasion. They are not identified with the U.F.O. community. Their prime and common unifying interest is seeing the development of a commercial starship industry during their lifetime. What has to be done NOW to achieve that goal is our apex of focus in what we are seeking by this disclosure and inquiry.

Of critical mass importance from our viewpoint is that when the time comes to white world the technology, the flight vehicle employed for announcement be in NO WAY connected to either A.R.V., U.F.O., the Nevada test site, the borrowed alien engineering and physics, or the tens of billions secretly spent of the taxpayer's ultra black dollars on the effort over the decades of it's research development.

We bring to the table among other things, a unique historical asset, legally possessed by a member of our group. We can guarantee it will be believed by virtually everyone that the A.R.V. technology discovery originated on this planet, simply because, over two billion dollars has already been spent establishing that as an expected predicate fact in the sooner or later consciousness of the planet's citizens.

We are therefore extending to the A.R.V. Development Group the first option for our technologies as our personally preferred initial silent partner in this endeavor. We recommend therefore that your associates give this proposal careful consideration as we are being pursued by other powerful institutions for development and licensing rights of our technologies.

In conclusion should we not receive a positive response to this confidential disclosure and

8

inquiry within fourteen days from ifs receipt, you may advise the powers that be, that we otherwise intend to continue developing this technology in other political and financial

environments. There are most definitely places and people where such serious scientific information and hard intelligence will be highly appreciated. No response will therefore be considered as an official blanket approval of our plans to go forward with our program of global development and deployment of these technologies.

We await your response to our inquiry.

Respectfully,

Gordon D. Novel

Message: RE: "DISCLOSURE / INQUIRY to your office of 11/7/97

Gentlemen:

Please kindly strike Burt Rutans name and or his firm Scaled Composites Inc. from having any direct affiliation or interest in this matter. Burt after reading the document recently sent to your attentions, appears to be extremely concerned about this research now potentially jeopardizing his ongoing BLACK PROJECTS and their related U.S. Government Security clearances.

Furthermore, Burt is not a member of our "Knights Temporal" R.A.M. Group. This applies to most of the individuals referred to in my personal Curriculum Vitae. Only those individuals who have received the first draft Galleys of our intelligence and science report book, "SUPREME COSMIC SECRET" - "How the U.S. Government Back Engineered A UFO," are considered "Knights Temporal" Team Members. The same applies to ALL of the Scientists referred to in the white world Physics literature attached to the "DISCLOSURE INQUIRY."

We strongly recommend that you or your associates concerned with this matter advise us on your interest relative to our "INQUIRY" before the 14 Day cutoff notice takes effect. We have erected a number of "Trip Wires" in anticipation of a negative or NO response and are very security sensitive to the time offer given to allow a decision to be made to our proposal.

I still anticipate that I will be in Los Vegas for a day or two this week. Perhaps when I arrive you or your associates may want to discuss the matter at that time.

Sincerely,

Gordon D. Novel
