I am proud of your continued efforts to disclose the truth of secret UFO files hidden from the public. I will be voting for Hillary Clinton to help get you the authority you need to obtain disclosure.

I hope history remembers your undaunting efforts to informing the American public about extraterrestrial visitation. I hope you can get into area 51 and other secret installations. Perhaps an official committee could be created, but unlike Project Bluebook you would look for the truth. Perhaps offer amnesty to those that come forward. Offer those who want to disclose UFO involvement a chance to be part of a great humankind awakening by detailing their activities.

My children are 2,3,and 5. I hope they grow up with a government that is open and honest about our place in the universe. The knowledge shared with our younger generation can serve as a spark for incredible human advancements.

Keep up the excellent Work!

Eric Brys
