Gentlemen:

I am interested in learning more about your organization. I have heard of it of course. I heard Prof. Hynek being interviewed on a local radio station just yesterday (KMBZ I believe).

On September 30, 1960 I saw an unusual air object at about 5:45 in the afternoon. I watched it for a considerable length of time. It seemed to be fairly low when I considered it in respect to the parallax of the treetops.

I eventually called the K.C. Star to see if anyone else had reported a sighting. They had, but I don't know whether it was the same object or not. I saw it from different angles:

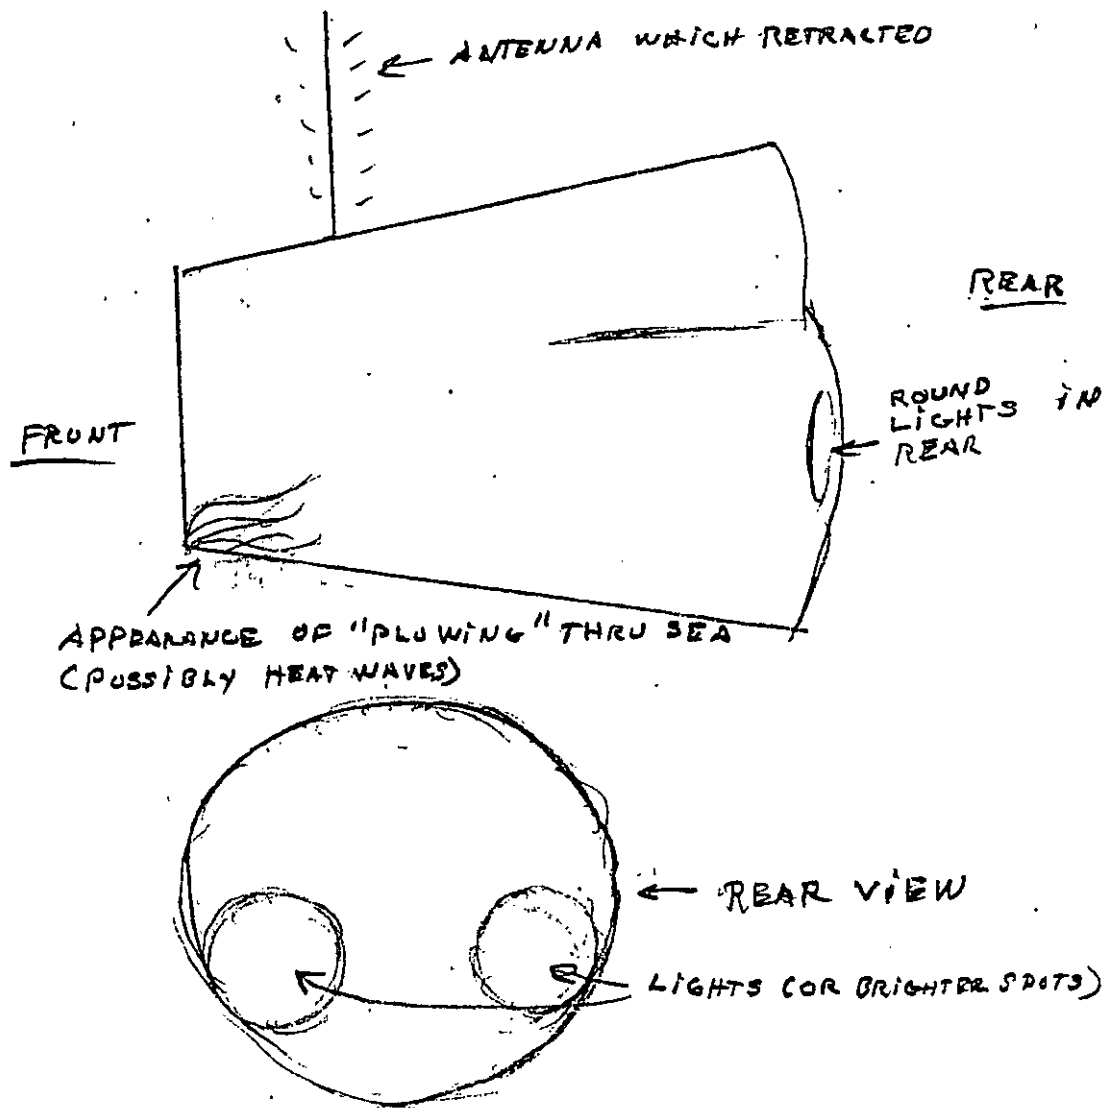

KANSAS CITY, MO

THE WHOLE OBJECT
WAS SILVER

I was in my car when I first saw a light. I stopped the car and got out and watched as it approached. To my knowledge, I haven't seen any object of this type or any other.

⚡ this is odd, because on his report form he described it as "bright, pearly white, shining" ... maybe he means that it was polished silver with the Sun blaring off it.

My drawing (on another sheet) is just a compromise between these varying drawings (esp. as regards rear lights size and placement) that he made.)

The "option" for this case might be a Balloon (much higher up) which carried this odd object, dangling from a cord ("antenna")... but he has to be pretty unsobersant for that.
