

I, your humble (sort of) servant, have only become acquainted with the topic of UFOs late in '87. For twenty years of casual familiarity with the subject I had come to assume that there was always an explanation that was scientifically based and rational. When I discovered that this was not the case it floored me. When I came upon the information included in "Night Siege" that a sighting of some consequence had taken place just down the street from where I had been on the same evening, I was further amazed. Needless to say, when the 8/31/89 sightings took place just outside my work place window (I work in the evening) and again I had missed it!... well, I take that sort of thing as a direct challenge. So be warned, whoever or whatever is out there; I may not be missing a leg but I will not miss my next chance (I hope).

Whatever does take place around here, be assured that I will contact you about it. I am in communication with someone from the Trumbull Times and have also made some contact with a local cable TV reporter (not overly interested, however), since I know that there is strength in numbers, and I can use all the help I can get.

Once again, thank you for taking the time to correspond with me (and for putting up with this rambling of mine).

Good Luck To You In All Your Endeavors.

Here are some locations that offer panoramic vantage points over those areas at which, on more than one occasion, something has been sighted. Since some of them are, to different degrees, impractical for extended night-time use, it might be worthwhile - if one is of a mind to - to mention to anyone you know who lives close to any of these places to keep an eye out between 9 PM and midnight on the evenings previously indicated.

TRUMBULL

1. Tashua Knolls Country Club Golf Course, along Madison Avenue; especially near the church at intersection of Madison and Tashua Rd. View to East & SE.
2. HillenDale Country Club, along Roosevelt Drive adjoining Scenic Hill Rd & Long Meadow Rd & Heavenly Ln. View to West towards Rt 25.
3. Nichols Memorial Park, along Unity Rd, opposite Saybrook Rd. Summit of hill that overlooks tennis courts gives view from Lake Forest to Pequonnock Vly.
4. Daniels Farm Road, from overpass off of exit from Rt 25 up to crest of hill, near Trumbull High School.

BRIDGEPORT

1. Brooklawn Country Club, at top of Algonquin Rd, near tennis courts. View to East.
2. Park Avenue, between Ninety Acres Park/Fairchild Wheeler Golf Course.
3. Saltsam Road, running parallel to Rt 8/25 junction; view to SE of Bunnell's Pond - Beardsley Park. Anywhere between Sylvan Ave and White Plains Rd.
4. Summit of Boston Ave, near Success Ave, gives good view of NE to SW Bpt.

STRATFORD

1. Between Trap Falls and Beaver Dam, intersection of Huntington and Shelton Rds (Bpt Ave?), overpass of Rt 8. View to SW.
2. St Johns Cemetary, off Nichols Ave near Stratford Armory. Also general Hawley Lane Mall vicinity: throughway interchanges/commuter parking areas.

These areas are not elevated but are right at or close to flight-path locations.

Merritt Pkwy, exit 46 & service area, alongside G.E. corporate HQ.

Tunxis Hill Park - Mountain Grove Cemetery.

All around Island Brook Reservoir

All around Canoe Brook Lake

Easton Reservoir, especially at far north point (Rock Raymond) and far south point (Dam off Park Ave).

I 95, between exits 25 and 28.

If all this seems a bit much, just think how convenient it would be if a lookout could be kept from one of these hi-rise buildings:

The Huntington Apts, Park Royal Apts, Embassy Towers, Executive House Apts, Dinan Center, St Vincent's and Bridgeport Hospital. (Maybe I should have myself put under observation at one of those!)

In order to view anything through binoculars, best lens types: 7X50, 8X56.

35mm film cameras: lens of 35mm or wider (lower number), using fast film: 1000 or 1600 ISO color print film. Manual lens setting: f4 - f7, but a tripod is still advisable for best clarity.

Eventually there will be an update and reevaluation of all the 8/31 sightings.

HAVE A GOOD HOLIDAY!

THURS — MAY 4

UFO sightings reported; Kaolian's unconvinced

By MIKE PATRICK
Post-Telegram staff writer

Fairfield County residents reported seeing a large, unidentified flying object soaring through the nighttime sky Thursday night.

But Sikorsky Memorial Airport Manager Morgan Kaolian blamed it on a group of nearby pilots playing a prank.

Easton resident Brian Dumas said he saw a UFO flying near his home between 9:30 and 10 p.m. Thursday.

"It looked like a flying-wing-type shape with lights in the back," said Dumas. "It flew over the tree-line in back of our house."

Dumas said the craft resembled the U.S. Military's new Stealth bomber, with red, yellow and blue lights in the back and a blinking red light on the right side.

But Kaolian, asked about the sightings, said: "They've got to be airplanes."

In the past, several pilots known as "The Westchester Group" have flown in circular formation and on cue have turned their landing lights

on and off, giving the impression of one mammoth craft, he said.

It is suspected this group then collects the newspaper clippings on the UFO sighting reports they created.

"They must have a bunch of belly laughs on the public," Kaolian said. "They usually pick very clear nights. I've been trying to catch them for years but I've never seen it myself."

A Trumbull woman who didn't want to be identified telephoned the Post-Telegram Newspapers, saying the low-flying object was as big as a football field and V-shaped.

A low, mellow hum was emitted from the UFO, which was adorned with lights, she added.

Trumbull and Easton police departments reported receiving several calls of UFO sightings Thursday night.

Ironically, the same night, local cable television suppliers broadcast the popular science fiction movie, "Close Encounters of the Third Kind."

It is about alien visitors who land on Earth in brightly lit flying saucers.

UFO sighted in Trumbull again; police receive 'numerous' calls

By DAVE PELLAND

If you are one of the many residents unsure about what you saw in the sky last week, then someone wants to compare notes with you.

Douglas Strickland, an engineer with Textron-Lycoming, said he is seeking information from residents of the Daniels Farm Road area who may have spotted some sort of unidentified flying object in the sky last Thursday night.

Strickland said he is seeking help from residents so he can compare notes regarding what people saw, as well as when and where it was spotted.

"It was a little bit confusing. I'd like to talk to other people to see what they saw," Strickland said.

"About 10 p.m., I got off the Rt. 25 ramp onto Daniels Farm Road. I saw a cluster of three concentrated, bright red and white lights. I dismissed it as a helicopter or whatever, but it was a bit too peculiar.

"It travelled slowly parallel to Rt. 25, towards Bridgeport, and then turned along Daniels Farm Road. When I got to Strobel Road I pulled over, and the red and white lights disappeared, and it looked like a blue boomerang—kind of like a giant hangglider with soft blue lights," Strickland said.

Strickland said he grabbed his father "to make sure someone else sees this" and the two men followed the object to the former golf course along Daniels Farm Road. He said the object disappeared, and the men spent more than an hour searching the dark sky in vain.

"I'm not crazy—I called the police, and apparently, I'm not the first one to call in," he said.

The Trumbull Police Department received "numerous" calls reporting a UFO flying low and circling, according to the department's telephone log.

"I'm really interested in pinning this thing down. My father worked in Sikorsky for 15 years, and he can identify a helicopter by the sound. This time I got him," Strickland said.

He said he is discounting the possibility that the lights were placed in the sky as part of a hoax.

"I can't really find a feasible answer. It would have taken a tremendous amount of money and energy to do this. I did some triangulation, and it was between 800 and 1,300 feet above my head. The lights changed color and a blue V formed out of nowhere. I don't know how someone could have pulled this off, or why they would want to.

"I'm not a crackpot, and I'm not the only one who saw this. I want to know what the other people saw," he said.

Strickland said he hopes that someone else who saw the lights contacts him at 732-4988 so he can learn more about possible explanations for what he saw.

"I'm really interested in talking to people and doing additional research. I want to get a better idea about whatever it was, and see if there is any information or parts of the story I missed. This is what I do all day—I solve problems. This one is particularly interesting."

GREETINGS ONCE AGAIN!

By way of an epilog/prolog to what has already been gone into, I thought I would provide you all with this report which was originally put together last June. These sightings were not investigated in sufficient depth or detail due to the reluctance of most of the witnesses. However, I believe the basic information is accurate.

On Thursday, May 4th, 1989, at about 8:55 PM, a married couple were driving up Dewey St, which runs along the eastern boundary of Mountain Grove cemetery in Bridgeport. They were on the way to meet with another couple at the New Colony Diner located at the corner of Main and Charles streets for a late dinner. Through a gap in the 20-30 foot tall conifers that border this large, old cemetery where lie the remains of P.T. Barnum, they spotted a group of bright white lights that appeared to be situated on top of the high rise apartment building located at 25 Cartright St (8 floors w/ penthouse: approx 100 feet high). At first they both wondered if these lights could be part of an air-conditioning unit of some sort that might have recently been installed on top of the building or if they simply had never noticed it before - they both work close to this area and frequently drive through it. However, as they arrived at the North Ave/Dewey St intersection and waited for the traffic light to change, they got a better look at what now appeared to be a "jet plane coming in for a landing". They saw a wing-shaped arrangement of evenly spaced white lights that had one red light blinking off and on at its port (left) side wing tip. Apparently at the same time that they stopped at the light and were observing this object or objects, the wing began to move towards them, or perhaps it had already been in motion but was not detected as such until this time. In any case, slowly and noiselessly it advanced until it was directly over the intersection where it then made a U-turn, moving "side-ways" in an extremely tight angle and in one single movement without any variation between the individual lights. As this occurred, the couple had to crouch down near the dashboard in order to look up through the front windshield and view what was happening. Both front side windows were rolled down in order to try and hear any sound coming from the thing. They do not recall any other cars or pedestrians being in the vicinity while this took place (there are two gas stations in this area, one was certainly open at the time).

Once the traffic light changed, they crossed North Ave and parked alongside Larson's Funeral Home at the corner of Briarwood Ave, got out of the car and watched as the object departed towards the northeast. The husband recalled seeing a string of pale green lights aligned along the back of the wing furthest from him (starboard). In other words, due to the angle they were observing from, he could still see the white lights that ran along the front of the left wing while noticing the green ones along the back of the right one. The altitude was claimed to be very low, something like that of a helicopter "hovering over your backyard, just above the treetops". A rough estimate would be somewhere between 200 and 1000 feet, of course, depending on its size.

After having watched this object for about 5 minutes altogether, they then proceeded up Briarwood, to Brooklawn, then went right on Capitol Ave towards Main St. Meanwhile, over at the diner which is about 2 miles northeast of where this took place, the second couple was waiting outside in the parking lot when they noticed this very same wing-shaped thing slowly heading north, roughly in the vicinity of Kennedy Stadium. Remarking to each other that this looked just like the thing they had seen about a year earlier over Milford reservoir, near exit 34 on I 95, the wing then made what looked to be a sudden change of course in their direction. As it passed overhead it either slowed down or stopped briefly, surprising this couple as well as a few others who were out in the street. After less than a minute the object continued bearing north, in the direction of Trumbull Shopping Park. Needless to say, the four of them had something different to talk about that night.

Secondary witnesses to the first couple's sighting were a teenage couple who were parked at Tunxis Hill Park, which overlooks the Rooster River/Mountain Grove area.

They noticed odd, stationary lights over the cemetery but, since they were otherwise occupied, they did not take too much notice of whatever it was up in the sky and thought it was an "eclipse or something". Another fellow claimed to have seen the wing passing over his house, which is located a couple hundred yards northwest of the park, heading down in the direction of the cemetery. (This ~~area~~ area is close to exit 25 on I95, where a similar object was seen hovering at about the same time of the evening on March 21, 1985. It eventually moved east along the interstate up to New Haven, causing many people to stop along the side of the highway in order to watch it. Many others phoned in their sightings to the Tiny Markel, WICC program.)

The next person to spot this wing was the young fellow mentioned in the Post article. His backyard faces east towards where the Easton reservoir dam is. In a phone conversation with him he claimed to have heard from people who sighted it passing over Canoe Brook Lake, east of the reservoir, and also hovering over the GE corporate headquarters building, alongside of exit 46 on the Merritt Pkwy, which is just southwest of the dam location.

Finally it was reported by Mr. ~~XXXXXX~~ d. Evidently the wing (or possibly a second one operating at the same time as the other) had changed direction again since it was heading south when he sighted it driving up Daniel's Farm Rd off Rt 25 south. And once again, seemingly simultaneous with its being detected, it veered off, paralleling Daniel's Farm until it disappeared over the field behind Trumbull High. Sighting duration was something like 10 minutes. Mr. Strickland has proven (along with Mr. Dumas) to be very difficult person to network with. During our only phone conversation he claimed to have contacted over 4 dozen witnesses to that night's activity, yet he failed to reciprocate in an exchange of information. Evidently he believes that anyone with an interest in this stuff is motivated by a desire to somehow profit from it and doesn't like competition. In any boring event, I wish him luck in his attempt to "solve" this particular problem, although I suspect that he has taken an early retirement from the project.

Weather conditions for May 4th:

Sunset at 7:56 PM

New moon on the 5th; moonset at 8:44 PM

Temperature about 60 degrees

High tide at 11:12 PM

Wind from the Southwest to South by Southwest at 11-14 knots

Sky was clear to partially cloudy later in evening

Notable news on that day:

Space Shuttle Atlantis launched from Cape Canaveral at 2:47 with payload of Magellan spacecraft bound for Venus to take radar mapping of planet. First U.S. planetary expedition in 11 years.

Defense Secretary ~~XXXXXX~~ announced temporary continuation of development of ~~XXXXXX~~ Bell/Textron experimental Vertical Take Off and Landing (VTOL) helicopter, V-22 Osprey.
