

XXXX - I TRIED TRACING ON YOUR ILLUSTRATION IN FLIGHT -

TAIL IS SLIGHTLY TOO HIGH AND NOT ENOUGH UPWARD STREAMLINED SLOPE. TRY MAKING YOURS ONLY AS HIGH AS WHERE YOU HAVE US ON YOUR ILLUSTRATION.

SET AIR INTAKES WERE EACH AS BIG AS YOU SHOW NEXT TO ~~CREW~~ CREW COMPARTMENT. YOUR PARKED ILLUSTRATION IS NEAR CORRECT SIZE EXCEPT BOTH ARE SIDE BY SIDE SAME AS NEXT TO FUSILAGE AND NOT OFFSET

IT'S TAIL IS ALSO TOO HIGH AND SHOULD BE SLIGHTLY LARGER WIDTH

CREW COMPARTMENT NOSE WENT DIRECTLY DOWN INTO FUSILAGE WITH NO SLOPE FORWARD DIRECTION

NO ACTUAL PHOTOS I SAW ON BIG ONE HAD ANY CAMOUFLAGED - ALL ALUMINUM COLOR - AND OF COURSE 3 WINDOWS EACH SIDE PLUS DOOR TO GET IN NEAR PILOT AREA.

FORWARD NOSE WHEELS DID NOT HAVE THAT BRACE YOU SHOW ON GEAR. IT CAME DOWN NEAR SAME AS MAIN LANDING GEAR. THEY WERE ALL SORT OF HINGED GEAR, NEAR MIDDLE OF EACH. ONE OF MAIN GEAR HAD PARTIALLY COLLAPSED WITH HINGE COMING TOWARDS FRONT. IT BENT SIMILAR TO YOUR ELBOW

PLEASE SEND COPY OF EACH TO AMERICAN HERITAGE CENTER FOR INCLUSION IN MY FILE. THANKS
