

Dear [REDACTED]

MAY 1, 2003

How are you? I hope all is well. I just wanted to give you a status update. I spoke to [REDACTED], and he stated that the article on the MacDill disks has been delayed due to the war. Hopefully, it will still be published in the July 2003 issue. I am also including 2 low resolution photos of my 4th prototype model. I had this model custom built from over-seas. It took 90 days to build it. As you know Jack, anytime that you try to relay a story to someone they always make mistakes in the translation. I sent the builders of this model all of my technical drawings and illustrations. I can see they made a few errors in the construction process. The color of the fuselage should be the same as the disk. The control surfaces do not match my drawing. It looks like they made a mistake with the air-intakes. I also noticed that they put the USAF insignia on the bottom of the disk, which you never mentioned seeing on the actual disks. However, despite these errors, they did a high quality job overall, and this model gives a fairly good representation of the appearance of the disk. I will just have to live with these errors, because it's now too late to correct them. They would have to re-paint the entire model over again. It should be arriving at my house within a week. I will send you better pictures when I receive the model.

Total Errors!

Regards,

5/may/03. Sorry! NO GOOD OR ANYWHERE NEAR ACCURATE MODEL!

LANDING GEAR WAY TOO BIG. NOT CENTERED
BETWEEN INSIGNIA ON BOTTOM. NO 4 EXHAUSTS
SHOWN EITHER. YOU & I WENT OVER APPEARANCE OF
CABIN OVER PHONE JUST A DAY AGO. REMEMBER, I TRIED
TO PERSUADE YOU TO CONCENTRATE ON A 40' ILLUSTRATION AND
MODEL. NO WAY COLOR IS OK EITHER! YOU DON'T NEED THESE TWO
PHOTOS SO I'VE TORN UP AND TRASHED. ANYONE YOU SHOW THIS MODEL
TO WILL BE SHOWN A TOTAL INEPT ERROR PHOTO AND MODEL. Sorry!, BUT I
SUGGEST YOU DESTROY OR FILE AWAY AS TOTAL MISTAKE, NO GOOD
AT ALL FOR ANYTHING!
