

My name is [REDACTED] and I am 82 years old. I have never had Physics or Chemistry classes so please keep that in mind as you review the information I am sending to you which just relates to my real experiences and not any academic explanations. That is the reason I included a "Mickey Mouse" Resume' (High School Reunion Request) just so that you would understand who I am and where I have been in my past career. Mostly Political Science and Human Services. You don't know me, but, we have shared some of the same folks in the past in the world of technology. I subscribed to your 6 Part Disclosure Series and that is what was the catalyst for the information that I am sending you at this time in the event you were unaware of it. I assumed that you were, but based on some of your video comments, I'm not sure?

First, [REDACTED] who you highlight on your programs, spent much time in the Salt Lake City area. He was a friend of my Brother (Doctor) and associated with scientists and some of the projects we were working on. In fact Pete, did the diagnostic work (Interrol Meridian Machine) on my Mother-In-Law in Park City, Utah in about 1990 when she had a problem with Shingles. At that time, there was a bit of tension over who had invented the Interrol Machine, Pete (CIA) or Dr H. Roy Curtin (BYU). Both were taking credit for it and Dr Curtin had set up a Clinic (Pleasant Grove) for "research" purposes as it could not be marketed at that time. Utah, however, was allowing it be used for research purposes and some of the technicians were Veterinarians who loved it because they could talk to the intelligence of

the animals utilizing the machines. My Wife had a Dental Technician diagnose her, and the technician had fallen in love with the machine as she was introduced to the technology when she was having seizures, and the machine diagnosed her problem as having Mercury Fillings in her teeth and when she had them removed, her seizures ceased. Well anyway, my Brother had spent a lot of time with Pete on high tech, but, as I explain later on, my Brother was killed along with our Inventor as a result of our "Free Energy Device"! Thanks to some of your Disclosure information, a lot of what Pete shared with us (My Brother) was validated.

Now that I have mentioned [REDACTED] there are other folks that we worked with that cross over into your Disclosure presentation. One was Hal Fox. Hal was working on Charge Clusters at the University of Utah Research Park (moved later) when he asked for help in getting funded. Our mutual friend was [REDACTED] who was specialized in "Kirlian Photography (competing with Russia) and his Uncle was previously over all the "Remote Viewing" (Stargate?) at the CIA. Dave (Now deceased from Drexel University) was brought to Provo, Utah, along with Dr Moray King PhD, by Dr Thomas Bearden PhD, for the purpose of trying to duplicate the T. Henry Moray "Free Energy Device" of the 1930-50s. (Moray had died and had written his secrets in lemon juice and the juice had all dissolved making it impossible to read and interpret). The Free Energy duplication effort by these scientist's of [REDACTED] were assigned to the "Eyring Research Institute" in Provo, Utah. At the time, it was all done in secret. Their cover story was that everyone at that location was working on Co-Generation of Power using gas and oil! I only know this because the Federal Government ask us to do them (The Center) a favor. They requested that my Brothers and I stop and debrief their scientists on Free Energy after each of our visits to our Inventor Floyd Sweet (Sparky) in Sherman Oaks, California. When we would arrive at the Research Center, we would meet with a few scientists behind locked doors and all the other Center People had no idea why we were there. An Irony was that the former Hospital Administrator of St Johns Hospital in Jackson Hole, Wyoming (Reginald Hughes) was now the Administrator of the Eyring Research Institute. When I was the Executive Director of all the Mental Health Clinics in Western Wyoming (Jackson Hole my Office 1975-80), Reginald was one of my best friends and I taught him

how to ski (I was former Ski Instructor-Sundance), even with his broken arm at the time. It was strange that two people in the health field, were now involved in "Free Energy", which according to Dr Stephen Greer MD, he had seen CIA documents that the Security Clearance for such work exceeded the H-Bomb and I no longer had ANY security clearance since leaving the US Navy Intelligence Office of the Admiral's Staff of 1st Fleet in 1960.

Well, back to [REDACTED] Hal, as you are aware, was involved with Cold Fusion. Ironically, my former wife (deceased in 2020) Diana, worked for the University of Utah Chemistry Department during the Cold Fusion Era while she was finishing off her degree in English. She made me promise I would never say anything about what happened there during Pons & Fleischmann and Cold Fusion. Now that she has passed on, I feel I am free of that obligation. It seems, as you may be aware, that BYU (Dr Jones?) was screwing the University of Utah as there was to be a JOINT ANNOUNCEMENT of Cold Fusion in Nature Magazine(?). The U of U found out that Jones was going to jump forward and make the announcement first, so Pons and Fleischmann had to make the announcement unprepared in order to be first. Additionally, the reason when you see any TV "file film" just water bubbling in a beaker container, is because a Graduate Student, who believed he had done most all the work and was not getting any credit, had locked up all the research in a safe and would not release it! Interesting for such an "earth shaking" announcement. Also, my Wife told me that they had accidentally blown a hole in the concrete of the Chemistry Department basement with the Cold Fusion which they didn't want the public to know. So Cold Fusion actually did get off with a real "BANG"!

While [REDACTED] was working on Cold Fusion Data and his newsletter, Hal was also working on Energy Clusters with my close friend David Faust who consulted with Hal on different projects. That was my first introduction to Energy Clusters in about 1987-92(?). Hal showed us a very impressive video presentation and then wanted us to help him acquire funding. We subsequently used another one of my Partners [REDACTED] who I was previously with in the Resort Business. Another Irony was that [REDACTED] (Just Months before he met me) had mistakenly purchased (For Subdivision Houses) the T. Henry Moray Laboratory property in Salt Lake City and then

lost \$10 Million Dollars having to clean it up (Radiation-Tesla Coil, etc.) [REDACTED] later got Leukemia and had to be treated at the Huntsman Cancer Center. Dan subsequently brought Hal an investor with \$100,000 for the Energy Clusters technology. BUT... [REDACTED] being a typical Inventor, blew the whole investment for the technology when the Investor vetted Hal and found out he had some "flaky" "Angel Funding" site on the Internet for funding Energy Clusters and she was less than impressed. So [REDACTED] project at that time to move forward with Energy Clusters was decimated as a result of his attempt at "Angel Funding"!

As they say in Fijian: "Sa Mate Vakadua"...It was then "really" dead!

As I have been talking about my friend [REDACTED] and Hal Fox, it is interesting to note how the MX Missile Project (1980s) in Southern Utah (500 missiles being moved on tracks underground--billions of dollars) "REALLY" got killed. People in Utah thought the President of the Mormon Church at the time, who said we shouldn't have missiles in Utah's backyard, was what killed the project. BUT...what really happened is that [REDACTED] Uncle with the CIA (Remote Viewing) contacted Dave and said before they go any further on the Utah Project, he should go to Hill Air Force Base (Ogden, Utah) Top Secret Library and that he had a packet of information sent there for Dave to review. [REDACTED] did go and reviewed all the information which said that the Remote Viewers were locating the "real loaded" (Out of 500 missiles—many dummy missiles) missiles BEFORE any Computers could find them! This meant that Russia was capable of doing the same thing America could do by using similar technology of Remote Viewing. So...this is the reason the MX Missile Project was scrapped in Utah even after all the initial monies had been spent on it!

While I have mentioned the connection of the Eyring Research Institute and the technology of T Henry Moray in Salt Lake City, I should mention another Irony of sorts and somewhat of a warning of potential collateral damage of high technology. In this respect, my former wife Diana (deceased) lived as a child in a house contiguous to the Moray Laboratory. My wife's Brother who was only 19 years of age had a Downs Syndrome Baby. The Doctors told him "it was basically a fluke" and he could have more children and they would be normal. About 2 years later he had another child who was also Downs Syndrome. Because my wife and I already had 3 normal children, we thought

her Brother's children were on his wife's side of the family. Our Fourth Child (Girl) was Down Syndrome and I understand that T Henry Moray's Son (Dr John Moray) ALSO had a Downs Syndrome child. So these are facts one must consider when dealing with "Free Energy".

The next part of my letter deals with our Nikola Tesla "Free Energy" Device made by our Inventor [REDACTED] (Sparky) who had worked at NASA with Senator John Glen (former Astronaut). As can be note from Documents I submitted here, Sparky was also out of MIT. I have understood that his records of attendance there have been "cleaned out" and I don't know that for a surety. If this has been done, they were unaware of the MIT Letter that I still have in my personal file which I included in my package to you. As I watched your video, you mentioned, if I am correct, that you seemed astonished at an output of 26 times vs input of electricity?...I was astonished at your comment when comparing what I had experienced with Sparky's Free Energy Device (330 Microwatts of One-Millionth of a Watt of Input would produce 500 Watts of Electricity (Negative-Positive) in 1989. Additonally, it seemed that you were questioning the levitation of Free Energy Device with adding more load to it. Once again, degrees of levitation, depending on amount of load on [REDACTED] Device, had already been proven in 1987 by Dr Thomas Bearden (DVD I included). In fact, the evidence that the electric source was Negative Electricity was physically proven when Sparky accidentally ran his hand thru the beam one day and his had was still hurting for a few weeks thereafter. (Was a freezing effect). Anyway, these are the reasons I have sent you this information on Sweet's Device in the event you were not familiar with it! In this respect, I won't say much more as I included a 9 page "Rough Draft" of my involvement with [REDACTED] and his Device. Please note that I have also included another Inventor [REDACTED] who invented a Magnet Motor for us to be a retrofit motor in any car and the motor would be operated by Sparky's redesigned device which was about the size of a cigarette pack that would power a 300hp motor forever with no charging. [REDACTED] had claimed he was from Atlantis and only here till 2012 (It was 1987) to help us and then he had to leave. My Brother (Doctor) told me that [REDACTED] did not have a bowel system. When I went on the road with Ron to move him from LaVerkin (Mouth of Zions Canyon) Utah to Oregon (Black

Helicopters were bugging him because he was using Tachyon Beams-Medical Equipment for healing) I never saw him once go into a restroom! As you will see from my Rough Draft, [REDACTED] didn't even know how to spell "electric" when I was helping to forward his mail at the Post Office. But, when he visited on the phone with Sparky (MIT Intellect), they spoke at the highest level of electronics. Also, I included the cover of the Official International Tesla Society Magazine where [REDACTED] is highlighted with one of his Magnet Motors. I was in shock when I saw the magazine as I had instructed Ron to stay hidden in Oregon where we had him and his laboratory hidden. He not only appeared in this Magazine, but, had also made an appearance "On Stage" at the International Tesla Society and made a presentation. You will find out more in my Rough Draft about the Earthquake Equipment he invented along with Philo T Farnsworth's Grandson. Both of them were hiding out as the Government wanted their Equipment.

Well in closing, I put a few other things in this packet that may or may not be of interest to you. You will notice a few pages of Xerox names. The essence of it are that these are just a few pages (Original 1" thick) of a list of potential funders that we were told would fund our Free Energy Device. The package was actually delivered to my Brother in a telephone booth at the Old Post Office in Salt Lake City. He met occasionally with this "deep throat" (Don't know if it was Pete's referral?) and we never knew his name. We were instructed that all we would say is: "The 'Company'" said we needed help in funding our project and we would have ALL the money we would need. Obviously, knowing who the Company was (CIA), we NEVER used any of these folks. What amazed me was how extensive (Universities, Post Offices, etc.) and broad the list of people and institutions included across the whole United States and some foreign countries. Document... An INCH THICK!

Please note that the info I have sent is a Hodge Podge of other peoples information that I may not totally agree with. Some of it is NOT correct like those that said Sparky died of a Heart Attack. You will see in my Rough Draft that it just isn't the case along with my Brother's death.

I also included a brief letter (E-mail) that I sent out to over 1,200 scientists

and Inventors worldwide who were attempting to duplicate [REDACTED]
Energy Device. I did include something in that email that I believe pertains to
what you were saying (?) in one of the videos I saw. If I am correct, it was
concerning the "Electrons"! Inasmuch as this is what caused my Electronic
Brother to literally go into a Depression and make the comment that he had
"wasted his whole life" (After seeing the Device Operate) and had to go
home and throw away 2/3 of his electronics library, it is as follows:
Sparky said: ... "he needed to REVERSE the conceptualization he was
taught about the ACTION of an ELECTRON and treat it like it was
POSITIVE. Therefore, for Sparky's modeling, Electrons were flowing and
acting in the opposite direction to what was normally modeled by a trained
physicist. Also, the Electrons were flowing on the outside of the wire!

I will finally close and don't have time to talk about my Brother's Giant bones
on Stansbury Island of the Great Salt Lake or our visit to the Las Vegas
Prison where other scientists ([REDACTED]) had told us they were harvesting organs
from the inmates. Take Care and if you have any additional questions about
any of the information I have included, you are welcome to contact me. I will
leave ways of contacting me.

Best Wishes

([REDACTED]
