To: [REDACTED]

After observing the comments made over the past year regarding the [REDACTED] VTA Energy Device, I decided to "come out of the woodwork" and explain what basically is NOT known regarding [REDACTED] and his energy device. Keep in mind that I am 70 years old, quite computer illiterate, and my background is mainly Political Science (Graduate Degree): consulting with State Legislatures; Mental Health (former Exec. Director of five clinics); and, acquiring Venture Capital for High Tech. Equipment (such as medical) and Projects. My story is very unusual and strange, but, nevertheless TRUE! At my age and experience, I have no one to impress with what I am about to tell you and I don't mean to "sound cold", but, I can care less whether or not anyone believes what I now explain. My only interest is to correct error where possible and to make certain information that is unknown--known! I apologize, however, that this report (attachment) will not be very coherent or structured and will probably contain a certain amount of spelling and punctuation errors. But, I need to hurry and get this info out and forget about all the writing detail!

As I do not have people's permission to use their full names in my report, I will have their names abbreviated or only use first names. I have included other attachments with this e-mail that I believe are important to establish my credibility that I was present with [REDACTED] over a period of time and even had an Agreement/Contract with him for all rights to the energy device (Note the Payroll Disbursement Log--We didn't pay Sparky much money). Also, [REDACTED] "Nothing is Something" publication was very important to him and that is why I have included it. I also include information regarding [REDACTED] who had his free energy device in SLC, Utah and a Magnet Motor by another Inventor.

Remember, in what I explain to you, it will be as someone who has never had an education in electronics. This was a real advantage for me because I did not have anything I had to UN-LEARN in electrical principles that [REDACTED] told us. Unfortunately, one of my Brothers who was trained (35 years) in electronics (other Brother was a Doctor) was "blown away" by [REDACTED] when Sparky told him that: "he

needed to reverse the conceptualization he was taught about the action of an electron and treat it like it was positive". Therefore, for [REDACTED] modeling, electrons were flowing and acting in the opposite direction to what was normally modeled by a trained physicist.---See what I mean!!---You will see in one of the attachments a letter from the Dean of the School of Science of MIT that verified that Sparky had an MSEE and was third in his class.

Now one last thing---I have not been impressed with some responses in this forum where a lot of "ego chest pounding" by certain individuals takes place. When I found that someone did not even know when Sparky died (guessed 50 years ago), I then know that people aren't doing their homework. I firmly believe that "an empty can rattles the most". Further, for some people, it seems that "every time they open their mouth, it subtracts from the sum total amount of knowledge they were assumed to have had before the conversation began"!!

Hopefully sincere researchers will be able to obtain some useful information in what I attempt to explain that will help them in the future to duplicate what [REDACTED] had. In this respect, one day after Sparky had repeatedly questioned me: "What is this device [REDACTED] after repeatedly giving [REDACTED] the wrong answer (energy device). I finally realized that what was important to Sparky was that the device was a TIME MACHINE--- his emphasis was NOT on the energy. He told me to never forget that what was most important was that the device was a "Time Machine".

Lastly, I don't believe that I will have much time to answer any further questions regarding the information I place in the first narrative attachment--I don't think I can add much more!! Also, if all someone wants to do is "bitch" about what I say, I definitely don't need to hear from them!!

Well, if you are still with me, then proceed to Attachment #1.

Cordially,

[REDACTED]
