1				
2				
3	Invention	Contact		
4				
5	System for converting water to H w/fuel cells & new battery for vehicles	Don Wilburn		
6	Perfected Howard Johnson motor	Owen Benson		
7	Fuel vaporizer, produces 30-60% improvement in MPG.	Lawrence Brightman		
8	Fuel atomizer	Charlie Brown		
9	gravity to energy converter	Joel Garbon		
10	Electricity from barium titanite	Mark Comings		
11	Inertialess propulsion	Bob Cook		
12	50 watts in/ 500 watts out. Special uses only.	Alejandro Correa		
13	Claims ability to build 5 KW generator	Andrew Weiss		
14	Claims to have built real ZPE in black ops projects	SG		
15	Magnetic Energy Converter	Ivan Kruglak		
16	Back EMF tube pulsed discharge effect	Steve Wilcken		
17	Perpetual motion ball system.	Tom Valone		
18	Power on Demand magnetic motor	Andrew Crosby		
19	Claims device that produces 350 HP hydraulically.	Buck Henderson		
20	Compressor for vehicle power	William Holm		
21	Controllable motor for multiplying elect. Input., up to MW range.	Hans Kaiser		
22	Magnetic motor with multi-KW capabilities.	Max Langenburg		
23	5 KW negistor extant, has been running for 2 years.	Gerry Champagne		
24	gravity to energy converter	Buckley Lofton		
25	Components to improve vehicular performance up to 200%.	Dave Maxwell		
26	leverage device to multiply force.	Gerry Mazza		
27	Magnetic motors in use in heavy industry.	Dax Hamilton		
28	Adams-type motor claimed ready to demo.			
29	Gravity reduction system	Evgeny Podkletnov		

	C	D		F
30	Gearing system that claims leveraged energy	Jack Prestridge		N/a
31	Solar levitating motor	Jerry Smith		
32	EMILIE (magnetic motor) 1/16 watt in, 2.1 watts out (DC).	Paul Sprain		
33	Catalyst additive to fuel	Richard Byrd		
34	Gray-based engine replacement for car	Doug Littlefield		
35	3 inventions (Nova Plasma etherizer, 80 MPG car, battery charger)	Andrew Weiss		
36	Biomass to NG, references to others' inventions	Dara Wilder		
37	100 tons/day garbage yields 90 MW + 100K gal. Water.	Andrew Weiss

3	Next step
4	
5	SG speaking to Bob Dennis-Lee.
6	Claims scientific endorsements but nothing to test.
7	1028: sending kit for us to use on fuel injected car.
8	On hold pending SG decision to commercialize.
9	Contact through Joel Garbon. Will contact us when ready to demo.
10	A "tank circuit" according to Norm Hays.
11	Boeing tests inconclusive. Wants \$50K but will not justify.
12	SG contacting through Mallove.
13	AIP: Objects to 3-4 test requirement and to 60 days on royalties.
14	SG to meet him; attempting meeting in D.C. at Valone conference.
15	Not responsive to queries; disagree with our "paranoid" strategy.
16	Have requested copy of plans that work, via Steve Wilcken contact Magradden.
17	Have requested 1 KW version; prefers to build tiny demo first.
18	Attempting to replicate claimed results, unsuccessfully so far.
19	Prototype to be built by 11/1.
20	JK asked Wilcken about replicating new experiment with fan and battery. Dax to build full engine in December upon completing Muller.
21	Device requires 7 figures to miniaturize.
22	Not able to follow through re: meetings with SG in Oregon.
23	Ready to demo. Attorney Decoto (sp.) is negotiator.
24	Requested \$20K to finish prototype. JK requested device recipe 1025.
25	1027: Proposed to drive two cars to C'ville for us to test, and retrofit our vehicle.
26	Wilcken attempting to understand his device.
27	Dax building 2 Muller motors. First one complete 102702. Second by 120402.
28	SG to contact S. African rep.
29	On hold.

	L
30	Demonstration underwhelmed Wilcken. Follow-on test proposed but not done.
31	Wishes to refine internally before proceeding.
32	Being tested at Valparaiso week of 1028. Eager to meet once confirmed.
33	Have supplied additive for our testing. Need emissions baseline tests first.
34	No interest in licensing. Sale only.
35	Contact through Weiss. Has signed AIP with SEAS. Awaiting SG signature.
36	Promised package of NG converter and quick charge battery for cars to be mailed by 1025.
37	Installing in Calgary and BC Hydro. 1027 requested LOI.
