Re: Free Energy Devices

Hi, Steve

As you know, I was elected a Vice President on the Board of Directors of the Institute of New Energy (INE) and [REDACTED] was also one of the Directors. INE had a falling out with [REDACTED] and IANS. They were afraid the conservatives because I and others were into UFOs and ESP, etc. They kicked us out.

I did my best, diplomatically, to keep a line of communications open with them. I haven't tested the line with Dr. [REDACTED] Ph.D. (Lockheed, Martin) yet. But, I'm still on good terms with [REDACTED] publisher of New Energy News.

I do know of some new energy devices that are over unity. [REDACTED] (sorry about the spelling) gave the researchers and inventors the one watt challenge. One watt over unity out put. There are some devices that are operational and some that are and have been marketed.

[REDACTED] PhD. Has invented the Patterson Power Cell and is now being tested. The Cell has 20x out to unity (20:1). The company name is Clean Energy Technology Inc. or CETI. Here is their home page web site: [REDACTED] I think [REDACTED] (spelling again?) is still backing them.

Another is [REDACTED] his company, Hydrodynamics Inc. Gainesville, GA, has been producing the Hydrosonic Pump since the mid 1980's, it produces steam and it has been tested and has 180% out put guarantee.

[REDACTED] gave NASA three and they have been in use and are being evaluated in NASA's three energy efficient test homes. I don't have the address at hand right now, because all my research data is in my library, at my condo, about 15 min. from my parents' house where I'm at now. I can get the info. to you by tomorrow night.

I believe we should get in touch with [REDACTED] and also [REDACTED] Ph.D. Aerospace Engineering and former science writer and prof. at MIT. Hal has a lot of contacts with inventors and ENECO that has pattern inventors, including [REDACTED] Gene also has a new energy research publication and good contacts. I have both of their address and will forward them to you tomorrow.

I'm sure [REDACTED] has some of the same contacts and info. along with others.

I've got a marketing video on the Patterson Power Cell from CETI and a presentation by [REDACTED] along with others.

[REDACTED]

Re: New Energy

Here are the addresses I promised you.

© 2006 Clean Energy Technologies, Inc.

FAX Tel.

can give you more info. on who is ready to go. Mention Brian and me and IANS, etc.

Re: Re: New Energy

Hi, Steve,

Here are the website addresses for [REDACTED] Mallove's Infinite Energy Magazine website links.

URL address, [REDACTED]

This address has links to [REDACTED] and "Infinite Energy Magazine", Institute for New Energy and [REDACTED] and Clean Energy Technologies, Inc. (CETI) and [REDACTED] among others.

The URL address for CETI is: [REDACTED]

I think [REDACTED] is heading up the Academy for New Energy; a part of IANS.

[REDACTED]
