

WORLDTRENDS RESEARCH

---

December 30, 1993

John:

Thanks for the material.

I suggest that one person who ought to be in on this from the very start is Brian Swimme, who is a mathematical cosmologist. He's the director of the Center for the Study of the Universe at the California Institute of Integral Studies in San Francisco. He's the author of *THE UNIVERSE IS A GREEN DRAGON*, and co-author of *THE UNIVERSE STORY*.

Swimme is probably not someone to be in on the organization or operations. His contribution would be conceptual. I have no idea what he thinks about UFOs, but his concept of the evolution of man and the universe is the most profound I've ever read. He's someone who Steve should personally approach.

I've never met or communicated with him.

If you like, let's have lunch some time next week.

Happy New Year!
