

WASHINGTON, DC 20510-4402

June 25, 2001

Mr. and Mrs.

Dear Mr. and

Thank you for contacting me regarding Unidentified Flying Objects (UFOs) and space exploration. I appreciated hearing from you.

As you may know, the United States Air Force (USAF) began investigating UFOs in 1948 under a program called Project Sign. The project name was later changed to Project Grudge and finally to Project Blue Book in 1953. The Secretary of the Air Force announced the end of Project Blue Book on December 17, 1969.

Between the years of 1948 and 1969 the USAF investigated 12,618 reported UFO sightings. 11,917 of these were found to have been caused by natural or human activity. Only 701 of these remain unexplained.

All the documentation regarding the former Blue Book investigation is located at the Military Reference Branch of the National Archives and Records Administration. They are openly available for public review.

Again, thank you for writing.

Sincerely,

United States Senator
