2			
3		Inventor/Licensors	Invention
4			
5		Aronsson	System for converting water to H ₂ /fuel cells & new battery for vehicles
6	Owen	Benson	Perfected Howard Johnson motor
7	Lawrence	Brightman	Fuel vaporizer, produces 30-60% improvement in MPG.
8	Charlie	Brown	Fuel atomizer
9	Thomas	Coe	gravity to energy converter
10	Mark	Comings	Electricity from barium titanite
11	Bob	Cook	Inertialess propulsion
12	Alejandro	Correa	50 watts in/ 500 watts out. Special uses only.
13	Mike	Emery	Claims ability to build 5 KW generator
14		Fauble	Claims to have built real ZPE in black ops projects
15	Sergey	Godin	Magnetic Energy Converter
16	Edwin	Gray	Back EMF tube pulsed discharge effect
17		Hartman	Perpetual motion ball system.
18	Tim	Harwood	Power on Demand magnetic motor
19	Buck	Henderson	Claims device that produces 350 HP hydraulically.
20	William	Holm	Compressor for vehicle power
21	Hans	Kelser	Controllable motor for multiplying elect. Input., up to MW range.
22	Max	Langenburg	Magnetic motor with multi-KW capabilities.
23		Larouche	5 KW registor extant, has been running for 2 years.
24	Buckley	Lofton	gravity to energy converter
25	Dave	Maxwell	Components to improve vehicular performance up to 200%.
26	Gerry	Mazza	leverage device to multiply force.
27	William	Muller	Magnetic motors in use in heavy industry.
28		Perendev	Adams-type motor claimed ready to demo.
29	Evgeny	Podkletnov	Gravity reduction system
30	Jack	Prestridge	Gearing system that claims leveraged energy
31	Jerry	Smith	Solar levitating motor
32	Paul	Sprain	EMILIE (magnetic motor) 1/16 watt in, 2.1 watts out (DC).
33	Harry	Taplin	Catalyst additive to fuel
34		Tilley	Gray-based engine replacement for car
35	Sonny	Ward	3 inventions (Nova Plasma etherizer, 80 MPG car, battery charger)
36	Dara	Wilder	Biomass to NG, references to others' inventions
37	Paul	Zanet	100 tons/day garbage yields 90 MW + 100K gal. Water.

3	Next step
4	
5	SG speaking to Bob Dennis-Lee.
6	Claims scientific endorsements but nothing to test.
7	1028: sending kit for us to use on fuel injected car.
8	On hold pending SG decision to commercialize.
9	Contact through Joel Garbon. Will contact us when ready to demo.
10	A "tank circuit" according to Norm Hays.
11	Boeing tests inconclusive. Wants \$50K but will not justify.
12	SG contacting through Mallova.
13	AIP: Objects to 3-4 test requirement and to 60 days on royalties.
14	SG to meet him; attempting meeting in D.C. at Valone conference.
15	Not responsive to queries; disagree with our "paranoid" strategy.
16	Have requested copy of plans that work, via Steve Wilcken contact Magradden.
17	Have requested 1 KW version; prefers to build tiny demo first.
18	Attempting to replicate claimed results, unsuccessfully so far.
19	Prototype to be built by 11/1.
20	JK asked Wilcken about replicating new experiment with fan and battery. Dax to build full engine in December upon completing Muller.
21	Device requires 7 figures to miniaturize.
22	Not able to follow through re: meetings with SG in Oregon.
23	Ready to demo. Attorney Decoto (sp.) is negotiator.
24	Requested \$20K to finish prototype. JK requested device recipe 1025.
25	1027: Proposed to drive two cars to Cville for us to test, and retrofit our vehicle.
26	Wilcken attempting to understand his device.
27	Dax building 2 Muller motors. First one complete 102702. Second by 120402.
28	SG to contact S. African rep.
29	On hold.
30	Demonstration underwhelmed Wilcken. Follow-on test proposed but not done.
31	Wishes to refine internally before proceeding.
32	Being tested at Valparaiso week of 1028. Eager to meet once confirmed.
33	Have supplied additive for our testing. Need emissions baseline tests first.
34	No interest in licensing. Sale only.
35	Contact through Weiss. Has signed AIP with SEAS. Awaiting SG signature.
36	Promised package of NG converter and quick charge battery for cars to be mailed by 1025.
37	Installing in Calgary and BC Hydro. 1027 requested LOI.
