Dear Steve, let's see how it is received? Please check for errors with others? I seek no name credit.

Just told the guy at Cold Spring Harbour that he needs better reviewers! Don't think he is happy about the paper either, may be getting a lot of flak?

Even if they do some experiments to prove the sequences correct, they still have to defend **"alien baby syndrome"** which seems almost impossible.

Good luck, [REDACTED] in Sydney
