Conference Adjourns

John B. Alexander, Ph.D., the Conference Chairman retired from the Army in 1988. He entered in 1956 and rose from private to sergeant first class, went to OCS in 1963, and retired with the rank of colonel. His military background includes combat experience commanding Special Forces teams in SE Asia from 1966-1969. An infantry officer, he also had several assignments in intelligence and research and development. His last position was Director of Advanced Systems Concepts for the US Army Laboratory Command. Along the way he also spent five years as a deputy sheriff in Dade County, Florida. From 1988 until he again retired in May of 1995, he was the Program Manager for Nonlethal Defense at Los Alamos National Laboratory. Dr. Alexander's education includes a B.G.S. from Nebraska-Omaha, M.A. from Pepperdine, and Ph.D. from Walden University. Later his education included work at UCLA, MIT, and most recently the Senior Managers Program in National and International Security at Harvard. He has written many papers about nonlethal weapons and chaired the first major conference on the topic held at Johns-Hopkins in November 1993. For that work, in 1994 he was selected as an Aerospace Laureate by Aviation Week and Space Technology. In 1995 he received a Department of Energy Award of Excellence for support to the Nuclear Weapons Program. Since 1994 he has served as a US delegate to NATO/AGARD for studies of nonlethal weapons, a position he still holds. Currently he is Director for Scientific Liaison for a private research institute in Las Vegas, Nevada.
