Hi [REDACTED]

Sorry for delay. Workload has increased over the past week or so.

That said, I did touch base with Senator Reid to get his input on this project.

In general, he was encouraging and in his words said that more funding was needed in this area. That said, he also cautioned about the challenges, specifically, overcoming the PR issues a Member would face working on this issue.

Senator [REDACTED] was in a unique position at the time he initially got the funding and in general had a fearlessness that most Members don't have.

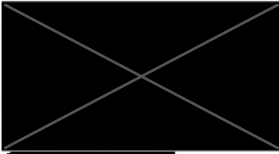

I have also spoken to a few staffers and they surprisingly showed a lot of interest and had knowledge of the general issue so that was encouraging.

All that is to say, this effort will require a long term commitment minimally 2 years of government affairs, PR and grassroots to achieve some of your objectives.

If you'd like I can put together a more detailed proposal for you all Over the weekend and then we can touch base again next week Does that work?

Again, apologize for delay.

Look forward to hearing from you.

Here are my thoughts on possible lobbying efforts for the purpose of proposing new legislation and loosening the reins around UFO secrecy and UAP information, as well as the lack of government and military commentary on these topics to the American People and the world in general.

First we need to understand the reason for the complete absence of information on this subject is most likely National Security. Therefore the second question needs to be IS this complete shutdown of information necessary and how is it protecting the United States of
