To Whom It May Concern:

Hello, My name is [REDACTED] and I am 34 years of age, and I have a story to tell. This may be different from a lot of stories that the disclosure project has been told by other witness testimonies since I was apparently used in a top secret experiment as a child at the University of Montana in Missoula that was sponsored by the CIA in 1972.

It starts even earlier with my father. [REDACTED] was born on January 20, 1939 in Arizona. Eight years later when his family was in Roswell NM, my father and uncle stayed with a family friend one night in July and after a thunderstorm and explosion that was heard the night before, they were taken to a field the next day and found debris the a portion of it is still with the family. The friend was [REDACTED]. This is the portion of the story that has been told by [REDACTED] and I would like to emphasize the fact that [REDACTED] as well as others may be using the "alien hypothesis" as a cover for what they may be really doing. They left Roswell soon after that and moved to Tx. They were migrant farmers looking for work in the 30's and forties unto the fifties. My father later on as a young man joined the marines and was appropriated by the CIA during the Vietnam War.

Here is my part of the story, I was born on February 23, 1968 in Springerville, Arizona. I had been born prematurely and almost died. I made it through this though and I now want to tell you about the story that started in 1972. I had started first grade and I was having problems in mathematics. So the school that I was attending had asked my father if I could be enrolled in a pilot program where they would test me and try to find out what the problem was. I was sent to the location and for nine months they ran all sorts of test on me from what would be considered normal, to the paranormal or psychic, this is strange if you consider the fact that I was suppose to be there to find out why I had a learning disability. It was soon after that that my father took me out of the program and we left Missoula MT. We left and for years my father would always tell my sisters and brothers to make sure that I got home and never to let me go home alone.

In 1976 years later my dad was investigating the apparent murder of his brother who had a crypto clearance in the Navy. He was then warned to leave it alone by a FBI agent, but he wouldn't. He had tape recorded phone calls and even one night had a few copies of the recordings stolen by a government agent. I was the witness to this. It was then that my father was called and threatened. We then left and we were followed and threatened with death over the CB radio with threats and taunts that followed over a hundred miles. It wasn't until my father hid behind a sand dune that they couldn't track us any more. I saw at that time a convoy of trucks and cars that circled that road we were on. We waited them out and in the morning my dad left.

Years later I worked for NASA/JSC in the cafeteria. I was on the fast track to becoming a Assistant manager of Building 11 employee cafeteria when I was ordered to go and take my employee physical. When I started I was being watched by NSA agents and even they called me by name and asked how I was doing. I never thought anything of it. They checked on me every two weeks and came in to see how I was doing. This all ended when I went to have my physical done. I had lost my way to building 8 where the clinic is located, and I found a man who was willing to show me where it was. His name is [REDACTED] I would find out

later that he wasn't an engineer working there as he told me he was, but the IG at that time of JSC. As we walked and talked about things I did and he did, I asked him if he could tell me if an idea I was working on was correct. I had thought up a concept for a electromagnetic propulsion system. We talked and he had asked me to draw a rough drawing of the concept, I then complied. We then said good bye and three weeks later my boss fired me after the NSA had a talk with him and a friend of mine who works NASA security and they where told that I was being considered a national security risk because of my concept. After this I was watched by the government and almost murdered by a government agent who had befriended my and when he had not done what he had been ordered to do. He was arrested and disappeared. His name was 

Since then I have found out that certain parts of my records have disappeared. The parts of my records that have my IQ test results, the most recent of witch said that I had an over 200 IQ result over all. I have had offers to work for the CIA, ONR, DOI, as well as funding from NASA and the Air Force for research into the concept that I am working on. I have declined so that I may work with SEAS and the Disclosure Group to assure that the concept will be marketed and not shelved. There is more to this story and I would like to under oath tell Congress and the public it in a open forum.

I do swear that what I have told is the truth!
