Im praying this message reaches you. My name is [REDACTED] and I need to report suspicious activity surrounding my true identity. I have been monitored by the United States military my entire life. The Navy told my mother I was what the called an Old Soul. Im a psychic clairvoyant and telekinetic, telepathy and starseed. I was forced unknowingly into a strange communicating whereby being kept in the dark by means of community protection and manipulation. My fiancé and my mother both have military associations in the past and my grandfather worked at Los Alamos labs on secret projects for the Cia. All of what I speak is truth but they do not want anyone knowing my identity or my truth in discovery of who I am. Or that im a psychic by any means. I discovered a lot about my past where I know they were testing my abilities as a child but cover it up. I would assume for their and my protection. I need your help. Im a whistleblower who has been lied to my whole life about my abilities and the fact that I have been monitored my whole life. I worked in Holistic Care for many years and have been dealing with backlash because my psychic abilities of sight are improving and they are trying to control it I believe for the same reasons they initiated Project Stargate for studies on psychics and remote viewers that were also used for black budget in spy related deep state control. They hate me for knowing all of this. But I can't help that I naturally have this gifts. Please Contact me at [REDACTED] I need another soul who may understand my predicament in this. This is also why you are seeing our own government take down non hostile by pentagon order recently because I asked for help through astral projection. And I know I'm not the only healer who has been under the gun on this. The government hates psychics with strong intuitive abilities especially if they are a telekinetic. What I speak is truth. You deserve to know at least I exist. At best. I pray my Master Bloodline the Ascended ones help you see this message.

--

Best regards,
