

Clinton

needs to be protected this year more than ever so that he may complete his mission as foretold in our notes in 1990.

I have finally caught up with the year after starting and collecting books, documents and other information for my company (Historical Data Retrieval).

I hope my data and or services may be of use to all of you. My experience in the intelligence field within NSA (Fort Meade) among other attributes. I

know there has been a discussion about loss of records, I would like to let

know there are always copies somewhere!!! Boxes upon boxes of rarely touched records sit in basements all over the world.

Well, anyway, I would like to pass on to all of you my message that I feel

is very important for the future. As we get closer to the next century many

fears and wonders will emerge. We must be logical, excited and ready for

whatever may occur. The reason for HDR (<http://www.azlink.com/~hdr>) and its mission.

LETTER TO ALL BELOW:::

To The Peoples of the United States,

Historically, the American culture has been based on the positive capabilities of its peoples. Its unique aspects include a positive attitude towards the future, a can do attitude towards problems, and a respect for the individual in a diverse society. During the last several decades the weaknesses of an imperfect society have been used against us. This process has been subtle and incremental. The Media's natural hunger for news has been coupled with an absence of in-depth research to create a condition of inaccuracy, which has become progressively more apparent during the last decade. This decay in the ~~Fourth Estate~~ has reached a point where an

air of confusion and mistrust has been fostered. This environment has reached the point where negative reactions to various provocation's could effect the stability of our nation. There is a goal to create an explosive, confusing and emotional powder keg.

As sovereign individuals we must all speak with our own ideas and thoughts. The Founding Fathers dream was that we would react intelligently as informed individuals with our experiences and common sense. These strengths will be heavily tested in the coming future. A great deal of analysis is being done which indicates that several scenarios have been developed, all of which have the long term goal of dramatically reducing our individual and natural freedoms. Several of these scenarios have a short term goal localized Martial Law and increased control of local government with the approval of the people. Some of these potential scenarios include concentrated terrorists acts in a specific community. An ~~XXX~~ID4~~XXX~~ paranoia, and severe ethnic confrontations. At the opposite polarity we see mankind stretching and yearning for the stars. If would put the world's resources to exploration, ecotechnology, and information utilization the problems would greatly decrease if not be solved.

History has shown that the enemies of the United States has a difficult time attacking us directly. Programs have been developed to infiltrate key positions and alter policy over the past 70 years. Through the creation of fear and mistrust in our institutions so that the people will rise up against them. The simple principle of ~~XXX~~Divide & Conquer~~XXX~~ has become very successful.

Many groups and individuals have been blamed for our problems. Even President Clinton. The truth is that many of our leaders have become ~~XXX~~Serfs~~XXX~~ to various programs. Our Founding Fathers long-term goal was to create a nation of sovereign individuals with the common goal to protect each other and those individual rights. As sovereign individuals it is our right and responsibility to demand truth without violence. Mankind has a tendency to become the sheep for generals and demigods with Christ-like self-images. It is time we stand beside each other with our individual talents, gifts, and experiences. Our Fathers understood that all mankind has the

potential to
work in cooperation, not separation.

Over 221 years ago, the ~~Great Experiment~~ began in America. We are the only nation that has successfully combined every culture, language, belief, religion and color within its borders. The success of this new society has the blessing of the creator itself. The freedom of information and the ability to share it openly is altering our future to a more sovereign world. True Freedom. The philosophy of enlightened self-interest requires no less of us all. The hoarding of information for personal gain is destructive of society and of the individual over the long term as history shows us. Only with a shared TRUTH can we build a MOSAIC of knowledge and understanding of the conditions which will confront next year (1998) and on. Therein lies the key to the solutions required.

THE HUMAN RACE IS UNIQUE IN THAT IT HAS THE POWER TO DESTROY AND TO CREATE
WITH JUST A SINGLE THOUGHT, FOR OUR CHILDREN'S SAKE LET US WORK TOGETHER TO
CREATE LIFE NOT DESTROYING LIFE.' 
1997

Signed:  Dec. 1997 <  >
