[REDACTED] re meeting ASAP

Dear [REDACTED] As 2015 unfolds, I understand you are leaving the Administration in February. It is urgent that we agree on a date and time to meet to discuss Disclosure and Zero Point Energy, at your earliest available after your departure. My Catholic colleague XXXXX will be there too, to bring us up to date on the Vatican's awareness of ETI. Another colleague is working on a new Space Treaty, citing involvement with Russia and China. However with Russia's extreme interference in Ukraine, I believe we must pursue another route for peace in space and ZPE on Earth. I met with President Obama's Honolulu childhood friend, US Ambassador Pamela Hamamoto on July 4 at the US Mission in Geneva, when I was able to tell her briefly about zero point energy. I believe we can enlist her as a confidante and resource in our presentation for President Obama. I appreciate XXXX assistance in working with XXXX to set up our meeting. Best regards, [REDACTED], ScD Chief Science Officer & Founder, Quantrek Apollo 14 astronaut 6th man to walk on the Moon PS T XXXX's cousin by marriage and former Mayor of Chicago Jane Byrne died recently. Raum Emmanuel was at her funeral.

Dear [REDACTED] Because the War in Space race is heating up, I felt you should be aware of several factors as you and I schedule our Skype talk. Remember, our nonviolent ETI from the contiguous universe are helping us bring zero point energy to Earth. They will not tolerate any forms of military violence on Earth or in space. The following information in italics was shared with me by my colleague Carol Rosin, who worked closely for several years with Wernher von Braun before his death. Carol and I have worked on the Treaty on the Prevention of the Placement of Weapons in Outer Space, attached for your convenience. NEW GREAT NEWS: Federal Minister for Planning, Development and Reforms Ahsan Iqbal proposed cooperation in space technology between Pakistan and China as part of the historic declaration, saying it will take the Pak-China relations to new heights.
<http://tribune.com.pk/story/937041/cooperation-20-mous-worth-2-billion-signed/> A consortium of 35 Chinese companies was also formed that will invest in Pakistan: Pakistan and China on Wednesday signed 20 memoranda of understanding (MoU) worth \$2 billion...emphasis on sustainability

<http://www.express.co.uk/news/world/597809/Anti-satellite-weapons-space-war-Earth-Russia-China-United-States> World War Three in SPACE? Fears over rise in anti-satellite weapons

created by Russia A HUGE rise in anti-satellite weapons being developed by world powers has sparked fears the West could soon be embroiled in a fully-fledged war with Russia and China in outer space.

War

in space isn't considered fantasy anymore

<http://www.aol.com/article/2015/08/12/war-in-space-isnt-considered-fantasy-anymore/21221875/>

We're arguably closer than ever to war in space. Most satellites orbiting Earth belong to the U.S., China and Russia. And recent tests of anti-satellite weapons don't exactly ease the scare factor. It sounds like science fiction, but the potential for real-life star wars is real enough. It's just not new. Fears of battles in space go back to the Cold War and several initiatives, like President Reagan's "Star Wars" missile-defense system. Deputy Defense Secretary Robert Work spoke to Congress in June about the threat. He said during a speech the technology the U.S. developed during the Cold War allows it "to project more power, more precisely, more swiftly, at less cost." Take a moment to think about everything satellites do. GPS, surveillance and communications all depend on them. And the Scientific American notes you can disable satellites without missiles. Simply spray-painting lenses or breaking antennas is enough. President Obama requested \$5 billion for space defense in the 2016 fiscal budget. And a former Air Force officer told the Scientific American most of the United States' capabilities in space have been declassified to send a clear message: There are no rules for war in space. Best regards, [REDACTED] ScD Apollo 14 astronaut 6th man to walk on the Moon Zero Point Energy Consultant
