Mr. Walter Rosenthal
[REDACTED]

Dear Walter:

Very good news! I am now permanently retained as a special consultant on the special device previously discussed in detail with you and Mr. Kozlowski. I will be working directly with Mr. Max Montgomery and Mr. Floyd Sweet, and doing everything within my power to get this project going and the first product successfully completed.

Over the last 18 months I have done a great deal of work on the relationship of gravitons to photons, and now have "broken the code," so to speak. Now one can see how and when one passes from graviton radiation to photon radiation and vice versa. This work is unique and is directly applicable to Mr. Sweet's device. What this work means is that we shall be able to go faster on the project than we had formerly estimated, once funding is secure and the scientific development team is in place.

As you can see, I'm very enthusiastic. This is simply the greatest technical project of the century, and perhaps of all time. I'm delighted to be aboard.

cf: Max Montgomery
Jerry Kozlowski

Sincerely,

Tom Bearden
