MEMORANDUM FOR: Assistant Director for Special Activities

SUBJECT: Unidentified Flying Object

REFERENCE: Attachments, 1 Feb 65

1. Detailed analysis of the ^{At 19 November} 1964 and review of associated correspondence indicates that there was, in fact, no high altitude ultra-high-speed UFO north of ^{during that} period. There were, however, apparently valid tracks and/or observations of unidentified aircraft in the vicinity of that ^{on 15, 17, 18, 19,} and 21 November 1964.

2. Relative to the incident during the evening of 19 November, the US Navy F-2C pilot was able to distinguish the object as a delta shape about the size of a jet fighter, reported it as having much higher performance, and estimated object speed to be in excess of Mach 3. The ^{reported a radar track in excess of 3500 knots.}

a. During this incident, ^{were} taken of the ^{presentation.} Analysis of ^{these} photographs show a good track in excess of 300 n.m. in the object in question. The object was flying a course of about 155° relative to the ^{at a relative speed of} about 250 knots.

SUBJECT: Unidentified Flying Object

b. At the time, the radar was undergoing an evaluation test program -- hence, the use of a recording camera.

3. In view of the land pilot observation, it is concluded that the so-called UFO on 19 November was probably a delta-wing fighter of a type having a significantly higher climb performance than the F-8C at the 50,000 foot altitude regime. Based on the limited information provided in the associated correspondence, other objects reported during the period of 16 to 24 November would appear to be unidentified aircraft.

4. Apparently, missile test firings were scheduled during this time period, and it is conceivable that the area in question could have been an attractive target for reconnaissance. This was located 325 n.m. from the eastern USSR during the 19 November incident, well within MiG-21 range. The USSR has a MiG-21 reconnaissance configuration.

There is no evidence at hand to suggest or deny any MiG-21 reconnaissance activity caused
