

Quick History:

Masters Degree: Political Science/Public Admin. (Soc./Psychology.)

Univ. of Utah; BYU; Univ. of Maryland; San Diego College

(Have moved 36 times since leaving South High in 1957-- ps..Perhaps I should learn how to get along better with my neighbors! :)

Firefighter--US Forest Service---Wasatch Front--(SLC, Ut.)

US Navy--Admirals Staff 1st Fleet--Intelligence Office --- (Coronado, Calif.)

Crystal Grower (ADP)---Electro Ceramics--- (SLC, UT.)

Fiji Islands--(South Pacific)--Church Mission (Companion and I first American LDS to learn Fijian Language)

Ski Instructor ---Junior Bonus/Alf Engen Ski School --- Sundance/Alta/Brighton Ski Resorts, (Provo, Ut.)

Consultant/Staff:

Maryland Legislature (Annapolis, MD.);-- Utah Legislature (SLC, UT)--Wyoming Legislature (Cheyenne, WY)
--"Legis50"-Center for Legislative Improvement": (Denver, Colorado) and (Kansas City, Missouri)

Executive Director, Western Wyoming Mental Health Centers--Four Counties (Office-Jackson Hole, Wy.).

("There are many similarities of illogical behavior in Mental Health Clinics and a multitude of State Legislative Leaders I have worked with!")

Pres., Board of Directors, C-V Ranches Residential School--Five Counties (Jackson Hole, Wy.)

Chairman--Board of Directors, Wyoming Governor's Council on Developmental Disabilities, (Cheyenne, Wy.)

Executive Director, Bio Scan Image Processing Laboratory-- Iridology/Retinopathy, (Las Vegas, Nevada)

Executive Director, Utah Independent Living Center for Severely Disabled (SLC Ut.)

Board of Directors, National Independent Living Centers, (Washington, DC.)

Executive Director, CampAmerica, (SLC. Ut.)

Partner/Owner: Red Hills Resort (St. George, Ut.)

Broker/Owner: Earth Realty, Developer of Resorts (Park City and Midway, Ut.)

I, of ,
, do assign full rights, power,
capacity and authority to DR. and
 of Salt Lake City, Utah, to negotiate
and represent me in all matters relating to past and
present corporate or personal contracts regarding
manufacturing, marketing, leasing, distribution of
inventions, products, systems, designs, formulas, etc.,
derived from any of my new technologies, I.E.:

PHASE CONJUGATE VACUUM TRIODES

(PCVT)

OR ENERGY AMPLIFIERS

It is understood and agreed that DR. DENNIS D.
CAMPBELL and I will be represented by legal counsel on
my behalf, and it is further understood and agreed that
all contracts or agreements concerning the above must be
signed by me, or assigned representatives.

State of CALIFORNIA
County of LOS ANGELES } SS.

On this the 3RD day of JULY, 1989, before me,

the undersigned Notary Public, personally appeared

☒ personally known to me
☒ proved to me on the basis of satisfactory evidence
to be the person(s) whose name(s) ARE subscribed to the
within instrument, and acknowledged that THEY executed it.

MIT

Massachusetts Institute of Technology, Cambridge, Massachusetts 02139

January 13, 1970

To Whom It May Concern:

Mr.  graduated M.S.E.E.,
Massachusetts Institute of Technology, 1969.

His thesis "Dynamics of Magnetic Domains"
is considered by the M.I.T. Scientific Community
unparalleled in magnetic concepts.

He received the coveted Dean's Award for
his endeavors in this area of scientific research.

His academic level in Electrical Engineering
achievement ranks third in the history of the M.I.T.
School of Science.

His extraordinary talent in areas of:
Engineering Mathematics, his concept of Electromagnetic
and related Electrical phenomena and understanding of
abstract intangibles to predict the unforeseen is invaluable
talent in the World of Sciences and Engineering. He is
one of M.I.T. graduates of whom I am extremely proud.

Sincerely,

OBSERVATIONS OF MY (AND TWO BROTHERS) TIME I SPENT WITH FLOYD
SWEET ("SPARKY") REGARDING HIS FREE ENERGY
(Approximately 1988-1995)

By: [REDACTED]

ATTACHMENT #1 NARATIVE REPORT—"SPARKY"

In about 1988 a gentlemen who my two brothers and I were involved with in the High Tech field realized that my brother, who was a Doctor (Dbr), was interested in negative energy devices for the treatment of the physical body (similar to Rife/Tesla Frequency Machines). His name was [REDACTED] and he had formerly been employed at NASA with [REDACTED]. [REDACTED] lived in California close to Sparky (Sherman Oaks) and that is where my story begins.

My Dbr and I were introduced to Sparky by John and we patiently awaited the time that we could see the VTA device. We saw it on the table at his house during various visits but it was not operating. Sparky was like many inventors who played games with you. Each time we would drive 13 hours to see him thinking we could see the device in operation, he would have some excuse for not turning it on or just ignore our purpose in why we were at his house. Sparky was always in his walking shorts when we visited him. I was always astonished that for someone (Sparky) who, according to MIT placed number three out of all their inventions from MIT (see attachment), Sparky always had to have his wife (Rose) turn-down the volume on the TV Game Shows and "Soaps" so we could communicate. I really could not see this couple "matched together"—Amazing!

On one visit, I looked over at Sparky and he was "showing off" his Barium Ferrite Bar Magnet. The magnet was "approximately" $\frac{1}{2}$ " thick, 7" long and 3" wide. He had a small piece of metal that was standing on the top of the magnet at a 45 degree angle. As I recall, he claimed that the 45 degree angle was needed in the treatment of the magnet so that it could capture Scalar waves. The magnets were mainly functioning as a "gate" for the Scalar waves. Additionally, if you placed a piece of thin "flexible" (ribbon type) metal flat on the top of the magnet, the middle of the "ribbon metal" would be "sucked down" flat at the middle of the magnet and both ends of the "ribbon metal" would be bowed-up at each end of the magnet. Also, I came to understand from another inventor that we introduced later on to Sparky that the "figure eight" design (flux flow?) on the top of the magnet played an important part in the functioning of the magnet—I don't really know about the concept and can't relay any additional information.

On another visit, Sparky demonstrated the flowing flux of the magnet. He had a (CRT?) TV monitor and he would place the magnet by the screen and you could see all the beautiful colors of the flux as it moved across the monitor screen. My brother of electronics (Ebr) told me that Sparky had told him that he had a way of treating the magnet by calibrating the Scalar wave angle coming in using the TV monitor. A side note is that Sparky delighted in telling people, when they asked how he treated his magnets, they should get the magnets real hot first. This apparently "screwed up" the magnetism and he enjoyed doing this for some weird reason!

Finally, after 12 trips across the California Desert, Sparky agreed to show us the Device in operation. In his defense, Sparky did claim that on some earlier planned demonstrations that his magnets had been "pulverized" by artificial earthquakes coming up through Mexico. He designed some type of buffer in the Device that eliminated the problem, but, it was an on-going problem for quite a period of time. This reminds me now that I must digress because I need to tell you about the Government (or who?) involvement with us.

When we first started to visit Sparky, our phones were all "tapped"—by whom I know not. My Ebr was with the Air National Guard full-time and his specialty was electronic Security, Crypto, etc. tied in with SAC bases in our area and surrounding states. Additionally, he had set-up the "clean room" for the President of the United States when he visited our State. I mention this because even my Ebr was doubtful in the beginning that we were all being monitored. On one occasion, my Dbr had his complete prior (twenty minutes later) telephone conversation played back to him when he answered the phone—I think it was probably some type of "screw-up" by whomever was monitoring our phones. My biggest complaint was the consistent early morning 3am call and then a "hang-up" when you answered—For what reason I know not other than for harassment purposes.

I give you the aforementioned information for the purpose of having you understand the seriousness of what we were involved with.

Sparky's Energy Device was mainly three things:

(1) It was a healing device—negative electricity—negative time. In theory, you could re-set the template in your DNA with this energy source and therefore cleanse the body of all impurities that your ancestors had acquired over time. Additionally, you could kill current disease (virus/bacteria) in the body utilizing the right frequencies without disturbing other body cells. This is why Sparky needed my Dbr to help him arrive at the proper medical protocol for using his technology. Additionally, if you note in the Payroll Expense Attachment of this e-mail, one line item expenditure is for AIDS related materials in which Sparky and my Dbr had a real interest. My Dbr had an agreement with Sparky to build three medical Interferometers which would all have a noble gas plasma inside. I actually witnessed one of these devices in operation. At the end of the tube like (approx. 20 inches) structure you could feel a pulsing being emitted at the end of the tube onto whichever part of the body you wanted treated. My Dbr had ordered two Interferometers from Sparky which were approx. 4' long.

(2) The VTA Energy Device is probably world's worst weapon. Sparky claimed that like Nicola Tesla you could cause "artificial earthquakes"—besides destroying buildings. As I understood from people in the intelligence world, which we debriefed after we saw the Device operate, three countries have what is called the "Tesla Cannon"; Russia, America and I never found out who the third country was. As mentioned earlier, this energy source is what disabled Sparky's VTA equipment over many months until he got his "buffer" built into his Device. Further, this is why the Federal Government had such an interest in what we were doing with Sparky over the time period we spent with him.

(3) The Device was an Energy source for the Home (could change to positive from negative energy) the Car and many other purposes. The cost to build one energy Device was only about \$200.00 to build—incredible!

Description of VTA Device:

On the day that finally arrived to see the Device operate, my Dbr and I had finally convinced my Ebr to accompany us to Sherman Oaks, California to see the Demonstration. My Dbr and I had made ALL the preliminary trips to see Sparky minus our Ebr because he was literally a "doubting Thomas", being heavily involved in the electronics field and full of Maxwell's Theories of electronics, etc. Yes, you could say that he was a traditional electronics person. But, for this reason, we needed my Ebr to be our DEBUNKER in case the Device was not what it was portrayed to be. We had one other Witness (Gary). An Associate of mine that was to bring the Venture Capital for funding if the Device was real.

On that "blessed day" when we arrived and witnessed the VTA Device in operation it is a day I shall never forget. To actually see a Device that only would cost approximately \$200 dollars and create all the clean energy you would ever need was "awesome". I know I have been "altered" ever since knowing that such a Device existed. Now for a brief description of the Device:

These are not exact measurements but only approximations. The Device was on what I believe to be Plexi glass. Nothing was hidden. You could see everything, top and bottom through the glass. The Plexi glass structure was approximately 18" square. We were allowed to pick-up the Device and carry it around Sparky's living room so you could see that there were no other electrical connections to the Device. On top of the Plexi glass were three toroidal coils wound with thin windings of varnish copper wire. There were two barium ferrite bar magnets (approx. 7"x3"x 1/2"). Present was a volt meter which displayed 120v when the Device was turned on. Also was an ampere meter that measured and reflected the electrical loads that Sparky would take turns switching on-and-off during the Demonstration. Such items for load demonstration consisted of a Cal Rad (sp?) I just called it the burner part of the stove!; a hair dryer, a fan, and five one-hundred watt globe lights. The fascinating thing to me about the light demo was that the lights had a glow like the overhead lights in your kitchen---a very soft, COOL appearance. Not the look of a traditional bright light bulb that you have in your lamp on a traditional night stand.

I forgot to mention that the Device was started by attaching a 9v battery which, as I understood, started the magnetic flux in motion. Sparky would then hookup the "pigtail" on the Device and it would become just one circular energy unit.

As Sparky would put more load on the Device, the ambient temperature around the Device (coils) would start to get cooler. Additionally, depending on how much load you added, the Device would start to lose some of its weight and you then had levitation beginning to take place. I should note at this point that on one meeting with Sparky, his Wife Rose, used some expletives in telling how one day Sparky kept adding more-and-more load to the Device. The consequences were such that the whole room went into a brilliant white (cool) color and Sparky almost "brought Down" the Apartment Complex where he lived at Sherman Oaks. He turned off the equipment, went out on his patio and pretended that it was a California Earthquake! His neighbors never did know what he had in his apartment. In this respect, I never did find out what the big piece of equipment was in his bedroom. It literally went from the ceiling to the floor. Was so heavy the floor was bowed-in and sunken and that "big sucker" had a growling noise when it was on---never did find out what it was? It was big like some kind of transformer?

The Rest of The Story:

You are probably wondering what the Article (attachment-Magnet Motor) on Ron Brandt is about. I have allowed his full name because he is already out in the Public Domain in the Tesla Magazine so I thought, "what the hell"! It's a long story but after I moved  (and his laboratory) all the way from the mouth of Zions National Park to "someplace" Oregon to hide him out---he was using "Tachy-on Beams with his medical equipment and after only a couple of minutes the "Black Helicopters" would show up---soooo at my Dbr's request I moved Ron to Oregon. At the time I thought Ron was a "real flake" because when I helped him forward his mail from a small town in Southern Utah, he asked me how to spell the word "electric" so he could put in the full address of "Brandt Electric". Further, Ron said he was only here on this Earth until 2012---It was now 1987-88?---and then he had to leave to another planet! I now wanted to shoot my Dbr who got me into

this whole move [REDACTED] thing! My Dbr told me that Ron had to move fast because Ron had told him that an earthquake was coming in the next few days---Right! Well, guess what happened a few days later? The largest earthquake in many years in that particular location took place and it even wiped out the hot springs at the Resorts along the Virgin River that runs through Zions National Park and through the small town of Virgin where Ron lived. I since found out that Ron had invented earthquake equipment along with Philo T. Farnsworth's (Inventor of Television) Grandson and they had actually predicted (six months ahead) the last great earthquake in California and were only off by six minutes. The Government is insisting they want the equipment so that is one of the reasons for everyone "hiding out".

Now, why am I giving you all this preliminary information regarding [REDACTED] Well it seems that Ron has the Magnet Motor which only weighs 75 pounds and can generate the equivalent power of a 300 HP gas engine. Also, the motor can be a retro-fit in ALL cars without designing a whole new car. This is the connection I will explain later regarding [REDACTED] who could not even spell "electric" and Sparky who, according to his Dean of the School, placed 3rd in his class out of MIT---All I can say is "WOW"!

EVENTS SURROUNDING SPARKY'S DEATH:

I will now leave it up to you to decide whether or not Sparky died of natural causes or was "taken out" by some person, group, or some Government.

In the summer of 1994, my Dbr suddenly "passed out" at one of our Venture Capital meetings and was rushed to the hospital. After an MRI of his head, it was discovered that he had a brain tumor and it was of the worst kind (very fast growing). This seemed impossible as my Dbr had always monitored his body daily as he did on occasion experiment on himself with certain medicines. By November 11, 1994, my Dbr had died. He told us prior to death that "they" (whoever they was?) had succeeded in placing the fastest growing cancer tumor into his brain---How--- I know not! Never did find out. What is important to the free energy field was that my Dbr was in daily contact with Sparky and his Associates regarding the energy devices. I was not that important and basically

only accompanied my Dbr to meetings and kind of "got lost in the woodwork". Intellectually, I really was not a threat to anyone. I was only there at meetings to help acquire venture capital.

On the very day that my Dbr died, my Ebr and I were at the home of John (Sparky's Associate from NASA) who for some strange reason had followed my Brothers and I to our home City where we lived. He then bought a home and took up residence. We did not complain as he was our go-between with Sparky. But the move still seemed strange to me. The reason my Ebr and I were with John is that John had arranged a conference call with Sparky and us to see if there was a possibility for Sparky to make some type of energy device which could power the magnet motor that Ron Brandt had—My Brothers and I had all the rights contractually to Ron's Magnet Motor— that we could use in any car. I thought to myself that now I can really find out how "real" (could not even spell "electric") Ron is when I match him up with MIT Sparky. I could not believe what I heard as Sparky and Ron conversed at the highest electronic levels—Who the "hell" is Ron I thought?—Sparky agreed that he would have no problem doing the prototype for  Magnet Motor to power the car.

Besides Sparky doing the car project (size of energy device was like cigarette pack), Sparky had told my Ebr that he would build a device for us that we could communicate with outer space. I know what your thinking, but, many times fact is stranger than fiction. I would not believe what I am telling you now if I had not experienced it "first hand" myself.

When on a few occasions we had asked Sparky where he received the information (conditioning of the magnets) on how to specially treat the magnets, he would point up and say that he got it from "out there"! He claimed that it took 3 days to receive answers to any questions and then they would come back in the form of geo-spheres (crypto like) holograms? This also meant that when he received answers he had some type of device for translating the holographic language. My Ebr verified this to me as he was specialized in Crypto with his past vocation in the military. Sparky mainly worked with my Ebr on this project as Sparky needed old

vacuum tubes that my Ebr had to acquire for the device and my Ebr was a real "bench" person which Sparky seemed to favor over academic Electrical Engineers.

During the Spring of 1995 while Sparky was working on our energy device for the car, John (from NASA) and Sparky were elated that there was supposed to be an announcement from the Whitehouse regarding Sparky's VTA Energy Device. It seems that Sparky was a past friend of Senator John Glen (former NASA astronaut) and he had given Glen one of the energy devices. Unfortunately, Glen gave the Device to the Dept. of Energy, who, according to Sparky, passed the Device on to General Motors. Sparky was furious and as I understood Sparky was then going to sue GM for \$200 million dollars. As far as I know Sparky never got the Device back. I will always remember the extreme disappointment on Sparky's and John's face when they realized the trip to Wash DC for the announcement was not going to take place.

In July of 1995 Sparky let us know that the Energy Device was finished and we were to take possession of it. Sparky now lived in Deseret Palms, California and that is where we would pick it up. After much thought, we decided we better not board a plane with the Device as we were not sure of any magnetic effects on the instruments of the plane in having it transported—new technology with still many questions to be answered. We instead decided to drive our car to Desert Palms and bring back the Device ourselves.

Sparky called us the day before we were to leave and asked us if he could keep the Device for a couple of extra days. He said he had "someone" coming (I thought he said China) and wanted to show them the Device. We said ok and we would plan to pick it up when he was done.

A day later, at about 7:00 am Pacific time there was a frantic call from Sparky's wife [REDACTED] (Sparky's wife Rose had died and he had re-married) to my Ebr's house. My Ebr was not at home and my sister-in-law, his wife, took the call from Violet. Violet was very traumatized when she told my sister-in-law that Sparky was dead. There was a lot of shouting going on in the background of the house. The people who were there claimed they were from the FBI and Sparky's Equipment belonged to them. [REDACTED] was extremely confused with the death of

 had never seen before taking all the equipment out of her house to awaiting vans. She asked my sister-in-law what to do and my sister-in-law had NO idea as she was not aware of all that my Brothers and I had going on!

Violet also said that about 5:00 pm the night before, two men showed up to see Sparky that she had never seen before. Sparky was with them for a period of time and then they left. At about 8:00 pm, Sparky was having a cup of coffee when he fell out of the chair onto the floor. She called for an ambulance and when they arrived they would not let her ride with them. Violet was 75 years old and didn't drive. About twenty minutes later the ambulance called back to Violet and told her they didn't think Sparky was going to "make it"!! As I understand, Sparky's body was cremated. How soon, I don't know.

The end result for my Brothers and I is that ALL of our energy equipment that Sparky made for us was taken---By Whom??

Who were the two men that saw Sparky a few hours before his death? Was anything placed into Sparky's coffee by these men? Violet said she had never seen them before and they seemed strange!

Why could not Violet go with her husband in the ambulance? I have seen it happen many times when family is allowed, especially where age is concerned!

How did the FBI (if that is who they were) know that Sparky was dead and showed up in the very early morning (about 6:00 am). Just hours after he died in the late night!

YOU BE THE JUDGE----ALL I KNOW IS THAT ALL OF OUR ENERGY DEVICES (MEDICAL AND CAR-MAGNET MOTOR) ARE GONE!!! WHERE ARE THEY AND WHO ARE THE ONES RESPONSIBLE FOR TAKING THEM!!

Hopefully, some of the aforementioned information may help to restore some of Sparky's incredible technology! I would strongly suggest that interested researchers spend time looking at Tom Bearden and Bedinis Websites. That's all I will say about the issue!

Cordially,

[REDACTED] 1989 meeting with [REDACTED] Sparky.)

The power unit was approximately 5x5x16 inches. It had six toroidal transformers and two Barium Ferrite (bar) magnets. It had two #10 wires coming out of one end and two #18 gauge wires coming out the other end. It was made of clear plexiglas with no moving parts. I put a 9V DC battery across the 18 gauge wire just for a second which activated the system. The system acted like a tuned tank circuit and multi-vibrator circuit to keep it running. No components in the box except the toroidal transformers and the bar magnets. The bar magnets had to be programed (conditioned). Sparky said it was one in a million chances to figure out his secret conditioning measurement. I think he might have been using a picture tube to see the magnetic field and toroidal electro magnetism to mix with the bar magnets flux density causing a demo razor blade he had to rest at a stable 45 degree angle off the bar magnet.

Sparky had what we call in electronics a "Bread Board" made up. It had a AC Volt Meter, Amp Meter and a Frequency Meter. The Board also had motors, transformers, fans and a 5000 watt stove element. As I hooked everything up separately, the meters went into the appropriate movement, 120 V AC, and amperage and frequency fluctuations. I looked around the room for transmitter or receiver, remote control, etc., I found nothing of outside support which might influence the operation of the Free Energy unit and of course no cords were attached to it as we were able to carry the unit around the room which we did.

Talking with Sparky, he said he put a load across the unit and the more electrical load he added to the device the lighter (anti-gravity) the device became in weight, and the ambient temperature around the device would decrease in temperature. One day he claimed that he placed too much load on the device and the room went a brilliant white and his apartment began to shake until he turned it off. His former wife Rose, who was present at the time of this incident, validated this story. In another room of his house, he had in operation a water cooled transmitter tube. I didn't ask what he used that for. He also showed me Geo-Sphere images with which he created a total alphabet so he could communicate and translate the Geo-Spheres with outer Space. He said he used it everyday to move information. He didn't need to modulate it with a carrier. No loss of power. I asked him where he found this information, he smiled and just pointed up and said "Practice channeling."

He shared with me that negative electrons are positive and the current in wire is going in the other direction, known as the "Hole Flow." (The point where the Sinusoidal Wave is at zero.)

demonstrating with two magnets how he checks their properties on a specially modified
TV

T. E. Bearden

April 26, 1989

Mr. 

Dear 

Very good news! I am now permanently retained as a special consultant on the special device previously discussed in detail with you and Mr. Kozlowski. I will be working directly with Mr. Max Montgomery and Mr. Floyd Sweet, and doing everything within my power to get this project going and the first product successfully completed.

Over the last 18 months I have done a great deal of work on the relationship of gravitons to photons, and now have "broken the code," so to speak. Now one can see how and when one passes from graviton radiation to photon radiation and vice versa. This work is unique and is directly applicable to Mr. Sweet's device. What this work means is that we shall be able to go faster on the project than we had formerly estimated, once funding is secure and the scientific development team is in place.

As you can see, I'm very enthusiastic. This is simply the greatest technical project of the century, and perhaps of all time. I'm delighted to be aboard.

cf: 

Sincerely,

DENNIS - For your files.

F

9 July 1989

Mr. 

Dear Sparky,

I just returned, several hours ago, from a two day meeting in Salt Lake City. It was an exciting time, I wish you could have been there. Everyone seemed to "mesh" with one another and we accomplished quite a bit. Both I and Walt Rosenthal feel very comfortable with all the participants and further feel that an excellent team seems to be forming around you and your compelling ideas! The participants in the meeting were:

We met with several Scientists at the EYRING laboratories and had a good old free for all exchange of ideas. As I said, I wish you could have been there, that atmosphere was electric to say the least. The people at the Lab certainly seem to be very capable and eager to test the device.

 has his attorney working forming up the necessary paperwork to establish a working relationship between us all and mentioned that he felt he needed another device to initiate testing both on the one coming back from the East coast as well as a newly built one. It seems reasonable to me that if an anomaly exhibits itself on one device, you would want to have a backup device also running to see if the problem repeated on the second device as well, indicating some sort of general physical phenomenon taking place as opposed to a simple malfunction on a given device. Dennis wanted to get the work started on that second device as soon as possible and since the Attorney will obviously take some time to prepare the agreements, I volunteered to send you a \$1,000 check to buy components in anticipation of these agreements and as evidence of my good faith. I will

instruct my accountant to get that in the mail to you tomorrow (Monday), so you may already have gotten it by the time you read this letter. If not, it will be a matter of a day or two at most.

I think we have the team in place. Now is the time for all of us to bend our best efforts to support you in your endeavors, and to bring your idea to what must be a sorely awaiting world. I'm excited, Walt is excited and we hope you also will be pleased with our meeting and our efforts so far. I promise you our continued concern.

Should you want to get in touch with me, for whatever reason, you may reach me during July through September at my mountain home as follows:

Area Code 

I also have a message machine at my home which I interrogate about every other day. That number is Area Code 
 If you need to get me as soon as possible and there is no answer at the  number, you may call my office, ask to speak to B.J. (my secretary) and have her get hold of me immediately to return your call. My office information is as follows:

I'm looking forward to the adventure!

Best Wishes,

cc:
