RE: Phone Conversation of this Evening & ATDG's Advanced  
Saucer Aerospacecraft, Advanced Non-Linear Electric  
Generators & ATDG's Advanced Wheel Systems & Technologies:

MESSAGE:

Dear Mr. [REDACTED],

Thankyou for your call of this evening. I very much enjoyed talking with you and I am sure that we can provide mutual-beneficial connections who are working for a new Renaissance world-wide by all countries, persons and peoples. This shall be of consideration and compassion for all and shall be accomplished within the Light of Our Creator, Who created all persons, souls, creatures and living things throughout the universes, including our Extraterrestrial friends. All live within what I refer to as The True, Living and Eternal Spiritual Realm of The Creator and survive as souls beyond biological "death" in The True, Living and Eternal Realm.

I have assigned all of my Inventions to ATDG which is established as an Off-shore Corporation. My creations are inspired by the Writings in The Book of the Prophet Ezekiel and are configured as "... a wheel in the middle of a wheel.", Ezekiel 1:16. As I also mentioned, we are working with Native Canadian and Native

THE REALM, INC.

[REDACTED]  
PSI APPLICATIONS)

American partners and we plan on introducing ATDG's various technologies and Consumer Products to a significant degree through the Native Communities.

Dr. [REDACTED] a partner of mine in a company ([REDACTED]) and he is the Vice President of [REDACTED] is involved as a new company in the development, manufacturing and commercialization of new home health care products and electro-medical products. [REDACTED] is also in a partnership with Dr. [REDACTED] son's company in Michigan, [REDACTED] Inc., etc.. I very much appreciate [REDACTED] thoughtfulness in asking you to call me tonight.

I look forward to learning and hearing more about your programs with regard to the introduction of the Galactic Federation (Confederation) and of its positive implementation on Earth and in various realms and universes for everyone's benefits. I've enclosed some information about my partners in ATDG, Mr. [REDACTED] and Mr. [REDACTED] who, himself, is Engineer of the Year this year at [REDACTED] and who is very talented physicist. You will enjoy talking with both [REDACTED] and [REDACTED] and I've asked [REDACTED] to call you this evening. We have many mutual areas of interest.

I am familiar with Dr. Edward Teller's involvement with MJ-12. Please feel free to pass along the enclosed materials on ATDG and about ATDG's Advanced Saucer Program to your two friends in MJ-12. I believe that we can provide benefits to you, yourself, to PSI APPLICATIONS and to MJ-12. Our Saucers will be sold to private pilots and commercial airlines and more advanced models shall have Earth to Lunar capabilities, etc.. They use a very Advanced Electric Generator (MAJESTIC-44) and very unique, new and Advanced Non-Linear Propulsion Systems which are, as well, environmentally-friendly and which can replace all jet and rocket engines and methods of transportation, etc.. We feel that this will be complementary to other Saucer Programs and to the introductions of our Extraterrestrial friends in a very positive Light and Spirit for all!

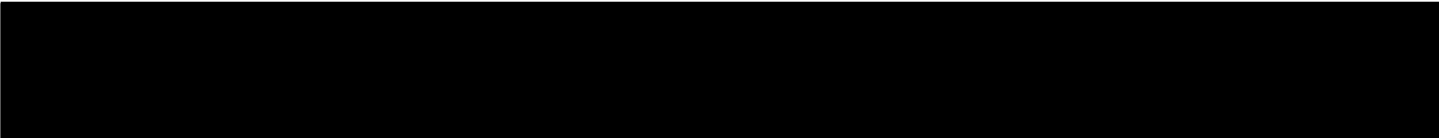

I look forward to hearing from you in the very near future and to establishing long-term relationships with you, PSI APPLICATIONS, and with my partners at ATDG. I am a representative of ATDG in Canada, etc..

[REDACTED]

**RE: ATDG'S ADVANCED PROPULSION SYSTEMS, ENERGY  
GENERATION SYSTEMS & ADVANCED SAUCER AEROSPACECRAFT**

ATDG is committed to the development and commercialization of readily achievable and economical Advanced Non-Linear Propulsion Systems for implementation in our Advanced Saucer Aerospacecraft designs. ATDG's Advanced Non-Linear Propulsion Systems and Advanced Saucer Aerospacecraft are planned to be a safer and more cost-effective replacement for current private and commercial airline transportation methods, i.e., jet and rocket engines, etc.. Additionally, ATDG's Advanced Non-Linear Propulsion Systems will revolutionize and revitalize the rocket and space commercialization industries by making it possible to economically launch and retrieve satellites as well as research and explore the other planets in our solar system. Just imagine the possibilities if one could go to one of the other planets in our solar system as easily and economically as we now take a flight to another country. What is most unique about ATDG's Advanced Non-Linear Propulsion Technology is that it is achievable with current materials and design methods and at costs which represent manifold savings over current manufacturing expenses. What is probably the most unique and insightful aspect of ATDG's design theories and principles is that they are totally based on and are in harmony with Nature and the Environment. We realize that on the surface this sounds a bit flowery and unscientific but the interpretation and implementations are completely systematic leading to powerful thrust generation and motion characteristics (capabilities) which are based on new and advanced physics, and engineering design implementations.

Using the same scientific and natural principles as in the propulsion technology, ATDG is also developing and commercializing very Advanced and unique Energy Generation Systems. These systems generate electrical energy while revitalizing the environment at the same time and they are also designed to provide for the electrical energy requirements of ATDG's saucers. ATDG's Energy Generation Systems are scheduled to be a safe and economically efficient alternative to hydro, fossil fuel and nuclear power stations. Furthermore, our Energy Generation Systems can be scaled down and made available for the individual consumer as well, such that the individual can provide power for their own house, farm, or region independent of the Power Grids at a fraction of the cost while improving the environment at the same time. Like all of ATDG's Technologies, the Advanced Energy Generation Systems are based on advanced physics and thermodynamics interpretations and implementations of natural principles. The implementation of our Advanced Systems do not involve the utilization of exotic materials or expensive equipment, but rather the usage of readily available and inexpensive off-the-shelf components and parts. This is accomplished through a thorough understanding of the underlying scientific principles that this technology is based upon and the synergistic merging of the best design processes.

ATDG's Advanced Saucers are also very aesthetically designed and ATDG is currently negotiating with the government of Ukraine and with the O. Antonov Aviation Sciences and Technology Complex in Kiev, Ukraine with regard to the full development and world-wide commercialization of ATDG's Advanced Saucer Aerospacecraft, etc.. ATDG envisions that the saucers will become commercially available as we enter the new Millennium.
