

7 August 1947

MEMORANDUM FOR THE OFFICER IN CHARGE

Subject: BERNHARDY, Guido, Helmut, Julius

Re: "Flying Saucers"

Investigation:

1. On 5 August 1947 LT. CANNON of the TRANSPORT (151/578)

Provost Marshal's Office contacted this office and reported that Subject, ~~who had attempted to enter the~~ ~~MOON Compound~~ had attempted to enter the MOON Compound for the purpose of contacting General CLAY and revealing to him the secret of the "flying saucers". The following information was obtained through interrogation of Subject.

2. *Results of Investigative Activity:*

(a) BERNHARDY, Guido, Helmut, Julius, [REDACTED]

[REDACTED] was born on [REDACTED]. He claims never to have been a member of any Nazi organization, and alleges that he served during most of the war with the Kriegsmarine (German Navy). He professes no technical skill, and gives his profession as student of history.

(b) On 5 August 1947 BERNHARDY stated that he was prepared to give the following vital information to General CLAY or to his adjutant:

1. The true interpretation of the "flying saucers" which are, according to Subject, a new and terrible weapon of atomic destruction.
2. The name of the foreign power which sponsors these weapons and which intends in the very near future to employ them for the destruction of the world.
3. The method by which the destruction of humanity may be prevented.
4. The exact location of HITLER and BORMANN.

(c) Subject was informed that an audience with General CLAY was impossible and unnecessary, since such information was always

for/urled indirectly. Subject refused to give the information indirectly, however, since he believed that time was too short, and that the terrible responsibility could be assumed only by the General himself. At this point Subject was given the address of the CIC office and told to report here at 0800 hours *16 August 1947* with a complete written account of his information. (exhibit "A").

(d) Subject will remain at the Rebstocker Bunker, Rebstockerstrasse, FRANKFURT until 10 August 1947, and will then return to DORN.

3. Agent's Notes Comments, and Recommendations:

Subject seemed extremely sincere, and the strong possibility that he is merely a crackpot is not apparent. For/warded for your information. Evaluation F-6.

Albert Goldstein
Special Agent, CIC
