ACTION: Amembassy PRETORIA

INFO: Amembassy CAPE TOWN

STATE:

REF: Cape Town 2025 - 3P 16

1. NASA has determined that sample of object found at bottom of Granger Bay consists of almost pure aluminum. Unfortunately, analysis of sample, and study of press pictures of object does not otherwise provide a ~~clue~~ clue as to its origin or function although it is possible it is a space object of US origin.

2. If a further analysis of object is desired, ^{by SAG} NASA is prepared to attempt this. The whole object would have to be shipped to NASA Hdqtrs., Code MOP, ATTN: Mr. Schulherr, 600 Independence Ave., S.W., Washington, D.C. 20446. Shipment expenses should be billed to NASA through Department, ATTN: Dwight Conrad, Code DHA-4.

3. It is requested not to place address or any other shipping info on object, as it important to keep it free from any extraneous markings. If object is determined to be of non-US origin, it will be returned.

Drafted by: NASA:KFMAutner;
