 Subject: Met the Sister of the Future President of the U.S.

8/28/04

Met the sister of the future President of the United States, [REDACTED] today, with about 100 other people, at the Estate/Family Farm of [REDACTED] in Asseri, near the Resort Restaurant Ram Luna, in Costa Rica.

She now lives in Massachusetts, and was/is a teacher (English History, Drama, and other subjects). Growing up, she and her brother John were "Foreign Service Brats", as she puts it, because their father was stationed for the State Department in many different countries.

I talked to her about the importance of Alternative Energy, and she says that John agrees. I mentioned we need to get rid of "big oil", and into alternative clean and inexpensive non-fossil energy. She said yes.

I told her I was going to a New Energy Movement conference in Portland, in a month, put on by a friend, [REDACTED] in which one of the presenters is Steven Greer, of "The Disclosure Project" which exposes the fact that for 50 years we have had the technology for clean and inexpensive energy.

She was very positive in her response, and my impression was that she was positive on behalf of her brother.

I talked to [REDACTED] of American Overseas for Kerry, who I believe is located in Boston, but is helping [REDACTED]

He agrees that the opposition is ruthless, and he agreed with my fears that of my golf partner, that there may be a surprise before the election (to keep Bush in power).

He mentioned possibly they have Bin Laden corralled and will get him right before the election, or there may be a "cell" waiting do some terrorist activity.

He says a lot of the voting machines will have no paper trail, and that many of them are put there by a Republican company.

He says Bush and Company wanted the oil in Iraq -2nd largest reserves in the World.

He says Kerry speaks French and has been working on Spanish.

He said something about Kerry being validated about Cambodia, and my golf partner, who was a bombardier for the Air Force during the Vietnam War, told Jim that their maps at the time omitted the border between Vietnam and Cambodia.

Later, after lunch, [REDACTED] made a speech:

She said she realized that a lot of us ex-patriots haven't voted in any election for a long time.

She said one person admitted to her that their last vote was in the Eisenhower election!

She or someone said that there is information coming out that George Bush failed his test for

aviation training by 25%, but through influence, got into aviation training as a pilot.
In the 50's her father was in the Foreign Service, and she and John got a lot of exposure to different countries.

She says John will work to:

Return the United States back into the community of nations.

Re-enter Global Partnerships, and cooperation with entities like the United Nations.

John is not an Environmentalist, he is a **Champion** of the Environment.

He will really attend to solving global environmental problems.

She was asked about why doesn't John get more aggressive.

She said strategically it is better for John to peak in late October, and things don't really get started anyway until after Labor Day.

She predicted that at the end of October that the Bush camp will have a buildup of "dirty tricks".

According to [REDACTED] 25-30% of votes will be by voting machines.
She is concerned about votes being counted..

CNN and FOX not helping to focus on issues.

We need to be "Beating The Bushes For America"

We must "Use our vote or we will lose our democracy"

People overseas can register to vote and **request an Absentee Ballot** at
<http://www.overseasvote2004.com> .

I do have a way to contact [REDACTED] if it is really important.
Sam

[REDACTED] permanent e-mail address is [REDACTED]
