Subject: NASA mtg

Steve: I finally go to [REDACTED] this am. Have tried off and on for weeks. She was very supportive of our attending the NASA meeting in Durham, June 8-10 on "Life, from local origins to Global Persistence". She knows one of the organizers very well, Michael Meyer (NASA scientist in the Astrobiology Program) and plans to talk with him regarding our attendance and forthcoming invitation. So it is not firm, but hopefully will be soon. Will keep you posted.
